16 SILT FENCE

SILTMASTA™ SediFence

SILTmasta™ SediFence is designed for protection of natural surrounding areas during the course of earthworks & construction activities for a variety of civil engineering & domestic projects. Sensitive aquatic margins require protection from sediment run-off which can contaminate water-bodies due to nutrient overload.

SILTmasta™ SediFence is utilized to prevent such contamination by flanking exposed soils or bordering entire construction sites.

Soil erosion, sediment and litter from construction sites can be major sources of storm water pollution and can cause significant harm to the environment.

Anyone on a building site who does not comply with sediment control regulations can be prosecuted or issued with on-the-spot fines. Companies, builders, subcontractors and individuals can all be fined.

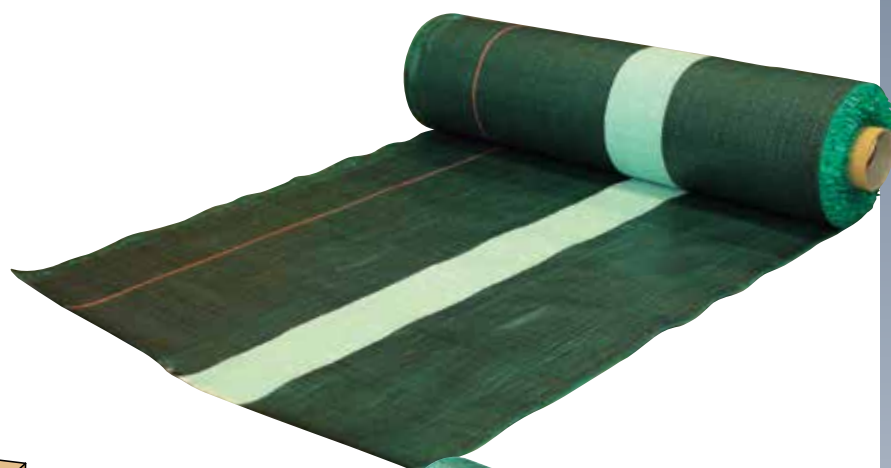

SILT FENCE**Genuine Siltmasta SF5000
- Premium Silt Fence**

Premium SF5000 Silt Fence is a special, high quality, permeable, technical filter fabric that can be installed as an entrenched vertical barrier fence, and is designed to intercept and detain runoff, trapping harmful silt through settlement and filtration before it leaves the site.

Roll Height: 750mm
Roll Length: 100m

Ideal for long term applications.

18 EROSION & SEDIMENT CONTROL

SILTMASTA™ SiltCurtain

The **Siltmasta™ SiltCurtain** controls silt run off in streams by acting as a floating barrier. The curtain is made from geotextile material with closed cell foam flotation and a ballast pocket at the bottom for chain.

Silt Curtains, also known as Sediment Curtains or Flotation Curtains are designed and used to control sediment, algae or debris movement in waterways. Silt Curtains consist of a high visibility reinforced plastic flotation pocket, a non woven needle punched geotextile skirt to act as the filter and ballast pocket.

20 WATER CLARIFICATION, TIMBER BLOCKS & WEDGES

DAMCLEAR™ FlocBlocks**FLOCBLOCKS**

Flocculant Blocks are a simple, convenient method for applying flocculant to water requiring clarification.

**Treat Inflow****Treat Full Dam**

CODE	PRODUCT	TYPE	PHYSICAL STATUS	PACKAGING	COMMENTS	PRICE	TYPICAL WATER CLARIFICATION APPLICATIONS						
							Sediment Retention Basins	SRB's Saline or Acidic	SRB's Enviro Sensitive	Irrigation Dams	Phosphate Removal	Algae Control	Sewage & Biological Waste
46-FANI	Floc Bloc ANI	Anionic Flocculant (PAM)	3kg Block	3kg Blocks	Rapid solids setting, no affect on pH, low aquatic toxicity	\$154.80	✓		✓	✓			
46-CACL20	Clarity Aid CL	Inorganic Coagulant	Liquid	Liquid grade 20L, IBC	Minimal affect on water pH, low aquatic toxicity	\$142.85	✓	✓	✓	✓	✓	✓	✓

Typical Applications

- **Construction Sites** - Clarification of storm water on building sites, housing developments and construction sites.
- **Mines & Quarries** - Clarification of storm water run-off from mining operations and stock piles of rock, sand and gravel quarries. Clarification of water from drilling operations.
- **Road Construction** - Clarification of storm water run-off at road, rail and tunnel construction sites.
- **Trade Wastewater** - Clarification of trade and industrial wastewater to remove solids and to thicken sludge.

Application & Benefits

- Flocculant Blocks are supplied as either rectangular bricks (210x170x80mm) or cylindrical blocks (170mmØ x 150mm). Each type weighs 3kg and will treat approx 300,000 litres of water.
- The most common methods for applying Flocculant Blocks are to place blocks at the entry point to the dam, at a point of turbulence that will ensure contact with most of the water flow. A point of turbulence may have to be created if one does not exist. Blocks should be secured in a wire mesh cage. Alternatively, water in a dam may be recirculated using a pump. The return water is pumped into a tank (~1,000L) in which the blocks are secured in a cage. Treated water continuously overflows from the tank back into the dam.

TIMBER WEDGE

PETROLATUM TAPE

RAM PETROLATUM TAPES are extremely surface tolerant and unyielding to moisture, acids, alkalis and salt solutions. RAM PETROLATUM TAPE systems utilize microcrystalline waxes which achieves excellent characteristics including high conformability, superior adhesion / amalgamation to itself and substrates whilst being user friendly to semi skilled applicators.

Surface Preparation

Wire brush dirt, loose rust and foreign matter from surface to be protected. Surfaces should be reasonably dry. On wet surfaces use RAM Marine Primer.

Priming

Apply a thin even film of RAM Primer over the metal surface by gloved hand.

Filling

RAM Moulding Mastic should be used where necessary to improve contours at fittings to achieve a streamline contour. The wrapped fitting with the specified overlap must have no voids, air bubbles and wrinkles.

Taping

Start applying the RAM Petrolatum Tape with a full circumferential turn around the fitting and utilize a nominal 50% overlap to achieve a double thickness of tape. Apply tape ensuring firm tension and then smooth down by hand to exclude any moisture and/ or water.

On each new roll of tape, underlap the new roll on previous by a minimum 100 mm.

Overwrapping

RAM High Temperature Outer Wrap should be spirally wrapped (similar to previous procedure) under tension to guarantee contact to achieve a nominal 50% overlap.

Step 1

PETROLATUM MULTI-PURPOSE PRIMER

- 1st step in the petrolatum pipe protection process
- Fills surface imperfections and ensures intimate contact between mastic tapes
- Used to prepare, seal and waterproof metal surfaces
- Protects pipelines from corrosion above and below ground
- Ideal for use as a rust preventative on exposed metal work
- 4kg tin

PRICE PER UNIT		All prices +GST
CODE	5 +	1 - 4
06-PP4	\$45.35	\$53.30

Step 2

PETROLATUM MASTIC

- 2nd step in the petrolatum pipe protection process
- Suited for use as a filler for voids
- Used to profile irregular shapes in preparation for application of petrolatum tape
- Great for use around flanges, bolts, pipe joints and valves
- 3 Litre block

PRICE PER UNIT		All prices +GST
CODE	8 +	1 - 7
06-PM3	\$35.85	\$42.20

Step 3

PETROLATUM TAPE

- 3rd step in the petrolatum process
- Synthetic, non-stitched, fabric based tape
- Impregnated and coated with petrolatum based compound
- Ideal for protecting pipelines, joints, fittings etc
- Often used to waterproof seal most surfaces above and below the ground (2 types, above ground and below ground)
- Prevents corrosion even under water

PRICE PER UNIT		All prices +GST	
CODE	TYPE	10 +	1 - 9
06-PTBG50	Below Ground - 50mm x 10m	\$13.90	\$16.35

06-PTBG100	Below Ground - 100mm x 10m	\$32.60	\$32.60
06-PTBG150	Below Ground - 150mm x 10m	\$47.95	\$47.95
06-PTAG50	Above Ground - 50mm x 10m	\$16.40	\$19.35
06-PTAG75	Above Ground - 75mm x 10m	\$24.60	\$29.00
06-PTAG100	Above Ground - 100mm x 10m	\$32.70	\$38.55
06-PTAG150	Above Ground - 150mm x 10m	\$49.15	\$57.90

Step 4

PETROLATUM OUTER WRAP

- 4th step in the petrolatum process
- Stabilised, plasticised, black over wrap
- Rubber based, pressure sensitive adhesive
- Waterproof
- Resistant to sunlight, salt water, alkalis, acids, oils and bacteria
- Provides mechanical protection of electrical resistance for inner wraps

PRICE PER UNIT		All prices +GST

22 SITE MARKER PAINT

THE SAFEST, LONG LASTING & HIGHEST VISIBILITY PAINT ON THE MARKET TODAY!

Considered a benchmark in the building and public works industry for over 15 years, SOPPEC Spot Marking paints were the first to be fitted with patented safety caps to guarantee flawless reliability for users. Perfect short-term and temporary marking, fluorescent, non-fluorescent, more environmentally-friendly (with a formula containing over 25% water).

WHAT MAKES SOPPEC PAINT DIFFERENT?

GHS04

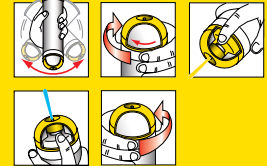

GHS02

(Figure 1.0)

(Figure 1.1)

CARCINOGEN FREE FORMULA

- The only paint that does not contain Carcinogenic, mutagenic, or toxic Components for reproduction.
- Designed without CMR compounds (carcinogenic, mutagenic and toxic...) to reproduction substances of class 1A, 1B & 2 above 0.1%.
- Without Hexane and Methanol, Toluene and Xylene.
- Pigments are mineral and organic, free from heavy metals.
- QSE Certified: ISO 9001 certifications for Quality, ISO 14001 for the Environment and OHSAS 18001 for Health and Safety.

PATENTED SAFETY 'TP' CAPS

- Features a patented lockable robust safety cap ensures the paint will **not leak or release gas** and eliminates accidental tripping during transport or handling. (Figure 1.0)
- Being the strongest safety cap on the market, it **can withstand a direct impact, being dropped from a height of 1.5 metres** on asphalt and remain intact.
- The design of the cap provides protection on the user's hand from paint projections when being sprayed (Figure 1.1).

SOPPEC WORKSITE SPOT MARKING PAINT

SOPPEC Worksite Spot Marking Paint is the safest, most visible and the most fluorescent marker on the market. It is particularly popular with surveyors for identification marking and setting-out, but is also used for all general civil engineering works: highways, earthworks, pipework and construction, buried networks. Easy and safe to use, this fluorescent spray paint is fitted with a patented safety spray cap which prevent paint leakage or the release of gas.

- Designed without CMR compounds (carcinogenic, mutagenic and toxic...) to reproduction substances of class 1A, 1B & 2 above 0.1%. Without Hexane and Methanol, Toluene and Xylene. Pigments are mineral and organic, free from heavy metals.
- Very long life and covering capacity: 1 aerosol applied using the Soppec One-wheel applicator is sufficient to mark a durable line 80m long and 2cm wide.
- Usable on a very wide range of surfaces, such as: concrete, asphalt, grass, gravel, sand, stone and wood.
- A particularly robust safety cap (a full aerosol dropped from a height of 1.50m will remain intact).
- High longevity, including on wet surfaces, of up to 12 months (depending on the surface, the application conditions and the UV exposure*).
- Rapid drying: approximately 10 min at 20°C.
- Temperature range: -20°C to 50°C.
- 25% more paint than 350ml cans
- Size: 500ml Net Volume (650ml Gross Volume) (345g Net Fluo TP, 415g Net Pro Marker)
- 12 cans per carton

4 FLUORESCENT AND 3 NON-FLUORESCENT COLOURS AVAILABLE!

LEICA DIGICAT DD130 PIPE & CABLE LOCATOR

The Leica DD130 cable locator feature advanced automatic controls making the DD130 easy-to-use, requiring minimal user experience. Avoiding underground cables and pipes is a major concern on construction sites. Therefore, detecting the position of buried cables and pipes before excavation work can help prevent operator injury, asset damage and any subsequent costs. Use the DD130 cable locators in conjunction with a DA220 signal transmitter or range of accessories to achieve improved accuracy and application scope.

With Automatic Pinpointing there is no need for you to manually adjust the sensitivity of your Digicat cable locator ensuring you're using the optimum sensitivity for the environment you are detecting the underground utilities in. Reducing the likelihood of human error and enabling easier and more efficient cable and pipe locating. Ultimately saving you time and money.

Kit Includes:

- DD130 Locator (50Hz), Alkaline
- DA220, 1 Watt Signal Transmitter with Earth Spike, Crocodile clip connector & cables
- Transmitter 100mm(5" Signal Clamp) 2m
- Locator System Carry Bag

GROUND PROTECTION MATS

- Creates an instant roadway over virtually any type of terrain - mud, sand, marshy, uneven or soft terrain.
- Protects valuable turf during landscaping projects.
- Superior alternative to plywood and fibreglass - will not warp, rot, crack or delaminate.
- Save time & labour getting vehicles and equipment traversed over difficult terrain.
- Avoid potential injuries to workers incurred while dislodging vehicles & equipment from mud.
- Protects vehicles & equipment from excessive wear and damage due to operating on unstable ground conditions.
- Easily handled and laid by two men - no need for expensive crane wagons.
- Simple to install
- Maintenance free & easy to clean
- Size: 2440 x 1100 x 12.5mm
- Weight: 48kg
- Colour: Black
- Lay as two parallel tracks or a single roadway, linked together with metal connections. Easily cleaned due to less aggressive lug pattern.
- Extremely durable to withstand vehicle weights up to 80 tonnes.
- Tested in extremes of hot and cold climates/ Can be used hundreds of times - Guaranteed for 7 years.
- Manufactured using super-strong high density polyethylene plastic (HDPE) and are chemical, weather and UV resistant.
- Each mat has a unique integrated tread pattern moulded onto both sides providing traction and stability for nearly any type of heavy equipment.

PRICE PER UNIT		All prices +GST	
CODE	25 +	1 - 24	
49-PROMAT	\$431.30	\$582.10	

*As with all temporary roadway systems, our mats are not suitable for use with steel tracked excavators and their use will result in damage to mats.

*Area should be relatively level, large rocks or obstacles must be moved before placing the mats;

*This mat is not bridge material, it should never be used to cross or span large gaps

*We suggest in-door storage, if stored outdoor, protection cover should be used in order to avoid strong sunshine / UV rays which will be harmful to the plastic.

GROUND PROTECTION MAT HOLDING PINS

Keep your ground protection mats from swivelling or moving while being driven over or walked on. Simple pin system. Available for joining 2 mats or 4 mats at once.

HEAVY DUTY INSPECTION MIRROR

The 230mm Heavy Duty Inspection Mirror has an extra strong adjustable handle with Spring Loaded Locking Pin to hold the extended arm firmly in place. The telescopic handle extends from 120cm up to 240cm and can cope with tough environments.

The mirror back is made from ACM (Aluminium Composite Material) which is lightweight, durable and will not rust and also includes a nylon protection bag for storage. Ideal for heavy machinery checks, vehicle inspection, bomb inspection, container checks, military, police and other security applications.

- Includes the LED light and bag
- Mirror size: 30cm

Take the headaches out of purchasing clothing and PPE with JAMS

What is JAMS?

JAMS (Jaybro Apparel Management System) is Jaybro's online uniform and PPE ordering system, enabling procurement teams to allocate approved clothing and equipment for all staff.

Individual employees can then log in and order their own equipment from your preset approved lists, whilst purchasing managers have centrally managed control over uniform allocations, branding and approved PPE.

This takes the stress out of placing uniform orders for staff, and gives procurement teams a centrally managed overview of budgets, orders, invoices and payments.

What are the benefits?

All in one solution

- JAMS provides one simple portal for employees to log in and order, with a simple, easy to use employee interface

Employee Specific Clothing

- Jaybro can set up a range of employee packs for different job functions, so staff can only view equipment that is suited to their role

Reporting

- Generate specific reports to present to Management

Multiple Delivery Sites

- Multiple delivery addresses can be set up so that the staff member receives their order directly to the site they are working on

Budget Control & Brand Management

- Budgets and branding are managed at a procurement level, giving purchasing managers full control to set limits, change uniform logos and embroidery, and review staff ordering habits.
- Manage your staff database and curate a centralised procurement team, as well as managing logos and uniform styles, all in the one place
- Prevent over-ordering, incorrect size issues and budget blow-out

How does it work?

Register with Jaybro as your Supply Partner

Jaybro will setup your employees and staff

Go online and login into JAMS

Set up clothing packs and start ordering your uniforms

How much does JAMS cost?

- Standard** - (\$120.00 +GST per month)

If you're interested in taking the hassle out of ordering uniforms, safety footwear, PPE and other equipment for multiple staff, get in touch with our safety team for more information.

ARC RATED CLOTHING

ARC RATED CLOTHING WILL SELF EXTINGUISH

WHAT IS ARC RATED CLOTHING?

An electrical arcing fault is often called an “Arc Flash”. The energy from an arcing fault may be sufficient to cause serious burns to nearby persons, or ignite flammable materials such as clothing. An “Arc Flash” can seriously injure someone who is not wearing the necessary protective clothing.

Australian industrial companies have started to replace the cotton protective clothing worn by their electrical and utility workers, with arc-rated protective clothing and Personal Protective Equipment.

Untreated cotton is flammable and has no flame retardant properties, which means once it ignites, it will continue to burn. The ongoing burning of cotton clothing against the skin of an individual increases the area, depth and severity of the burn received. By contrast, arc-rated clothing will self-extinguish and stop burning after the arc has been extinguished.

FLAME RESISTANT LIGHT WEIGHT OPEN FRONT SHIRT – RAIL X PATTERN

- RF rated reflective tape and accessories
- Rail standard reflective tape configuration (AS/NZS 4602.1.2011)
- Twin chest pockets with FR closure

* Size charts should be used as a measuring guide only. Garments will vary according to style and fit of the garment.

HOW TO MEASURE

NECK	Measure around neck, allowing room for two fingers behind tape.
CHEST/BUST	Measure around chest, making sure tape is level at the back. A firm chest measurement should be taken.
WAIST	Make sure the trousers are sitting comfortably, and measure over the waistband of the trousers.
INSIDE LEG	Measure up from the crutch to the top of the heel of the shoe.
HIPS	Measure the fullest part of the hips, making sure tape is level.

FOOTWEAR SIZE CHART

Use your foot size in millimetres to find the equivalent Australian / UK size. If you're in between sizes, it's usually safer to go up a size. Also note that for boots manufactured in Australia, the half sizes refer to a slightly wider width, but the same length as the full size. For example a size 10 and a size 10.5 will be the same length, but the half size has a fractionally wider toebox.

LIGHTWEIGHT 7 LED CAP LAMP

KH2M-Ex is a lightweight model of the Cordless Miner's Caplamp and Torch series in 7-LEDs. Every LED has an individual concave reflector so a well focused beam can be achieved. It also features a longer operation and low cost suitable for various mining and other applications when both focused beam and low cost are demanded.

- Luminous intensity: 1000 lux for all LED's on
- Battery lifetime: 80% C after 500 full charging cycles
- Operating voltage: 3.7
- LED lifetime: 30,000 hours
- Enclosure rating: IP67
- Charging time: 7 hours
- Duration: 16 hours for all LED's on
- Battery: 2 AH Li-on
- Weight 100g

56 HAND PROTECTION

Griplite

GLOVE STANDARDS - EN 388:2016

According to this standard, characteristics such as abrasion resistance, cut resistance, tearing strength, puncture resistance and impact protection are tested. In conjunction with the pictogram, four numbers and one, or two letters, will be displayed.

These signs indicate the performance of the glove. It's important to understand is: it's not the gloves performances that has changed. It is the way of testing the performances that has changed.

EN388:2016

1234BP

1. ABRASION RESISTANCE (0 TO 4)
 2. CUT RESISTANCE, COUP TEST (0 TO 5) X= N/A OR NOT TESTED
 3. TEARING STRENGTH (0 TO 4)
 4. PUNCTURE RESISTANCE (0 TO 4)
 5. CUT RESISTANCE, TDM TEST ISO 13997 (A TO F)
 6. IMPACT RESISTANCE* (P) IF NO 'P' SIGN, NO IMPACT PROTECTION IS CLAIMED

CUT LEVEL B

CUT RESISTANCE BETWEEN 5 AND 10 NEWTONS

In this category you will find thin and flexible gloves for tasks that have a lower risk for cut injuries such as personnel who pack, distribute or receive goods in warehouses.

CUT LEVEL C

CUT RESISTANCE BETWEEN 10 AND 15 NEWTONS

This category represents gloves for tasks with a medium risk for cut injuries such as personnel who handle sharp metals, plastics or similar materials in different industrial environments.

CUT LEVEL D

CUT RESISTANCE BETWEEN 15 AND 22 NEWTONS

Gloves with Cut level D offer adequate protection when there is a risk for cut injuries when handling glass, metal, tools or machinery with sharp edges.

CUT LEVEL E

CUT RESISTANCE BETWEEN 22 AND 30 NEWTONS

Cut E offers a high level of protection against cuts in work environments with sharp tools and machinery.

GRIPLITE ONE GLOVES

Ideal for a wide range of purposes, it is an economical solution for use in light fabrication, construction, civil, plumbing, manufacturing and warehousing applications. Available in sizes 7 to 10, the Griplite Heavy Duty Glove features a 13 gauge polyester palm coating that provides medium level grip. The full palm coating and open back ensures good protection whilst still allowing for ventilation and user comfort.

GRIPLITE SIX HEAVY GLOVES

The Griplite SIX Heavy Duty gloves provides strong abrasion and tear resistance for tough jobs. This 'C' rated nitrile glove for cut resistance is suitable for applications where cut risk is higher than usual. The breathable liner and form-fitting shape make it comfortable enough for all day wear. Available in sizes 7 to 11, it is constructed with a 13 gauge nylon, HPPE and glass fibre coated nitrile palm. The palm is fully coated with an open back ensuring user comfort and ventilation in warm environments, and the nitrile wrinkle grip coating provides excellent grip.

- Cut C Hand Protection
- Available in sizes 7, 8, 9, 10, 11
- Bright red colour with black glass fibre coated nitrile palm
- Tested and approved to new EN388 glove standards
- EC Directive for PPE (Directive 89/686/EEC)
- Meets the requirements of EN 420:2003+A1: 2009 and EN 388:2016

GRIPLITE SEVEN GLOVES

The Griplite SEVEN is the newest work glove in Jaybro's popular Griplite range, offering strong abrasion and tear resistance for heavy duty applications. Ideal for fabrication, manufacturing, sheet metal work and handling applications that require excellent abrasion and cut protection. With a grey coloured knit nylon & glass fibre liner, the Griplite SEVEN features a sandy nitrile palm coating for reliable hand protection.

- Tested and approved to new EN388 glove standards
- Meets the requirements of EN 420:2003+A1: 2009 and EN 388:2016
- Available in carton quantities of 144 pair

SAFETYDOCBOX STORAGE BOX

The SAFETYDOCBOX sets a new and innovative standard in safety.

It changes the way in which documentation is managed, stored and utilised on site; eliminating the confusion and uncertainty that has previously existed in this area.

The SAFETYDOCBOX is aimed at reducing the probability of your firm having to incur unnecessary cost and expense.

This is achieved by the change in perspective that the SAFETYDOCBOX has brought to the industry, modifying the manner in which site-based safety is dealt with.

The SAFETYDOCBOX will serve to increase productivity on-site by reducing the number of labour hours lost to administrative inefficiency.

FEATURES & BENEFITS

- Waterproof document housing unit to store JHEA/JHA's, Take 5's, Engineering drawings, Danger Tags, Hot Works Permits etc.
- Dimensions: 1000mm high at front, 1200mm high at rear. 700mm wide and 600mm deep.
- First Aid box and other safety consumables can be stored and monitored on the shelf.
- Highly visible on site and can be used as a Muster Point.
- Space available to accommodate company logos and first aid stickers
- Australian Design and Patent.
- Ballast at the base which can hold over 45kgs of water making the design extremely sturdy in all weather conditions
- Injection and Blow Moulded using HDPE
- UV Resistant for up to 25 years

68 RESPIRATORY PROTECTION

BOOK YOUR QUANTITATIVE FIT TEST

In order for a respirator to provide the intended protection it must seal tightly to the wearer's face. AS/NZS1715:2009 states; fit testing is required before a user wears a respirator on the job. Also, fit tests should be performed annually.

Booking a quantitative fit test should be part of the scheduled routine when any tight-fitting respirator is being worn. Conducting a facial fit test should be part of the best practice process when:

- Issuing a new respirator
- The respirator has been in service for a period of 12 months
- The wearer has experienced excessive weight gain or loss
- The wearer has undergone major dental work.

Once the quantitative fit test is completed, the wearer is issued with a pass certificate report. The report of a successful pass will be emailed to both the wearer and the company.

Jaybro can provide in-house and onsite respirator fit testing in NSW and QLD.

Terms and Conditions

For a respirator fit test in Accordance with AS/NZS1715-2009.

- The attendee must not eat, smoke, drink coffee or chew gum for at least 1 hour prior to the testing. (Doing so may lead to excessive waiting times)
- The attendee must be cleanly shaven. (If you are not clean shaven you will not be fit tested.)
- Each appointment is for a single respirator (If you require a second fitting, please book a second appointment.)

Visit us

13 Penelope Crescent Arndell Park NSW (ORANGE HIRE BUILDING)

LIGHTWEIGHT 7 LED CAP LAMP

KH2M-Ex is a lightweight model of the Cordless Miner's Caplamp and Torch series in 7-LEDs. Every LED has an individual concave reflector so a well focused beam can be achieved. It also features a longer operation and low cost suitable for various mining and other applications when both focused beam and low cost are demanded.

- Luminous intensity: 1000 lux for all LED's on
- Battery lifetime: 80%C after 500 full charging cycles
- Operating voltage: 3.7
- LED lifetime: 30,000 hours
- Enclosure rating: IP67
- Charging time: 7 hours
- Duration: 16 hours for all LED's on
- Battery: 2 AH Li-on
- Weight 100g

SUNDSTROM SR200 SILICONE FULL FACE MASK

The Sundström SR200 full face respirator provides very high protection at heavy-duty work for extended periods. The respirator offers added eye and face protection, and a higher protection factor than half masks. Use with filters, supplied air, or Sundström PAPR. Very high protection factor (NPF 2000)

- Two exhalation valves
- Valve caps with air diffusion (no clogging during spray jobs)
- Low weight
- Fabric head harness - no sticking rubber
- Unique curved visor for exceptionally wide and deep field of vision
- Part of inhalation air is channelled across the visor to minimise mist forming
- Accepts all Sundström filters and compressed air attachments, as well as PAPR

80 GAS DETECTORS

GX-3R FOUR GAS DETECTOR

MADE IN JAPAN

The worlds smallest 4 gas monitor - Only 100 grams**The newly developed dual-sensor configuration reduces size by approximately 30% compared to previous models.****Lightweight (about 100g) means it won't interfere with your work.**

- World's smallest and lightest 4 gas monitor
- 3-year warranty
- Only Approx. 100g
- Water and dust resistant, IP66/68
- Loud alarm buzzer 95dB at 30cm
- Robust design (Withstands 7m drop)

Large LCD Display

Simultaneous display of all gases

Battery Life:

Up to 25 hours of operation

2 Button Operation

Glove friendly

Removable Impact Resistant Boot

Dust & Water resistant, IP66/68 Rating

Audible Alarm Ports

Audible, visual, & vibration

Colour Coded Sensors

Easy to replace

The GX-3R is the worlds smallest 4 gas monitor weighing only 110 grams and can comfortably be clipped within a workers breathing zone (55mm W x 64mm H x 26mm D). It simultaneously monitors and displays LEL combustibles, O₂, CO (Hydrogen compensated CO also available), and H₂S.

The GX-3R represents the latest evolution of gas detection technology utilizing a new generation of micro sensors. The LEL sensor has a unique design with two active filaments in one sensor to increase it's resistance to silicone poisoning. If one filament gets poisoned the second filament takes over. The new O₂ sensor is electrochemical with a 5 year life span. H₂S and CO are now available in a combo micro sensor.

Safety supervisors will appreciate the non-compliance indicator. The instrument flashes it's 3 LED lights every 30 seconds, if the instrument has been exposed to a gas or has not been bump tested or calibration is due. The 3 LED lights will continue flash once every 30 seconds until the non-compliance condition has been resolved.

OSHA defines the breathing zone as a ten inch radius around the worker's nose and mouth, and requires that worker exposure monitoring air samples be collected in the breathing zone. Air sampling filters may be attached to the collar or lapel. Traditionally this means only a single gas monitor would be small enough for a worker to practically wear a gas monitor 'In the breathing zone'. Now there is a 4 gas monitor smaller than many single gas monitors.

Features:

- Simultaneous detection of 4 gases LEL, O₂, H₂S & CO
- Smallest / Lightest 4 gas monitor on the market (55mm H x 64mm W x 26mm D), approx 110 grams
- Dual audible alarm ports (95 db @ 30 cm)
- 3 visual alarm LED's
- Vibration alarm
- IP-68 Waterproof / dustproof design
- Non-compliance indicator
- Large capacity data logging standard
 - 8 alarm trends
 - Log time range of 10 to 300 hours
 - 100 calibration records
- 25 hours of operation (Lithium-ion batteries)
- Large LCD display screen
- Automatic backlighting at alarm
- Impact resistant body
- STEL and TWA readouts
- Intrinsically safe, IECEx, ATEX
- 3 year warranty

Applications:

- Confined spaces
- Hazardous material
- Refineries/ chemical plants
- Personal monitoring
- Utilities
- Water/wastewater plants
- Fire services
- Pharmaceuticals
- Oil & Gas
- Construction

GX-2009 GAS DETECTOR**MADE IN JAPAN****Features:**

- Simultaneous detection of 4 gases LEL, O₂, H₂S & CO
- One of the Smallest / Lightest 4 gas monitor on the market (70 H x 70 W x 25 D mm), approx 130 grams
- Dual audible alarm ports (95 db @ 30 cm)
- 3 visual alarm LED's
- Vibration alarm
- IP-67 Waterproof / dustproof design
- Calibration lock out or reminder controls
- Large capacity data logging standard
- 8 alarm trends
- Log time range of 10 to 300 hours
- 100 calibration records
- 20 hours of operation (NiMH batteries)
- Large LCD display screen
- Automatic backlighting at alarm
- Impact resistant over-mold body, RFI shielded body
- STEL and TWA readouts
- Intrinsically safe, IECEx / ATEX approved
- 2 year warranty

Applications:

- Confined Spaces
- Hazardous Material
- Refineries/ Chemical Plants
- Personal Monitoring
- Utilities
- Water/Wastewater Plants

MSA ALTAIR 4XR MULTIGAS DETECTOR

- MSA's cutting edge log life XCell sensors
- Dependable multigas detector tests for LEL, oxygen, carbon monoxide and either hydrogen sulphide or nitrogen dioxide
- Economical construction saves users more than 50% on calibration gas, replacement sensors and maintenance
- Five-year sensor life means detector lasts 60% longer than the industry average
- Large buttons and high-contrast screen make operation easy in low-light conditions or when wearing gloves
- Ribbed rubber housing provides secure grip and high durability
- Exclusive end-of-sensor warning cautions user when unit's sensor needs to be changed
- MotionAlert option tells others that user has become immobile
- InstantAlert provides manual alarm to alert others of a dangerous situation
- MSA Link™ allows users to transmit data to a computer

86 PERMANENT DAVIT SYSTEM

PERMANENT DAVIT ARM & BASE SYSTEM

The Davit arm and base are coupled together to provide a fixed anchorage point for work winches or rescue systems for entering confined spaces. The Davit arm has the ability to be removed from the base and moved from job to job, where there are other bases. The arm is able to swivel and provides easy access in many situations.

- Max Working Load: 140 kg
- Measures 2060mm high x 710mm wide
- Base weight 13 kg, Arm weight 19 kg
- Packed size 1.2 x 1.2 metres
- Meets Australian Standards AS/NZS 1891.4 (Basic Rescue Winch)
- Conforms to EN795 Class B
- Bolts hold the upper tube to the base, but these can be loosened to allow for 360 degrees swivelling
- UV resistant metal
- Must be fitted to a structural anchorage capable of withstanding 15kN working load
- Secure to ground with 8 x M16 epoxy bolts
- Base plate dimensions 300mm x 300mm
- Note that this item should be certified after installation by a qualified engineer
- Requires certification every 12 months.

PRO-3 DAVITS

- 3 piece construction for ease of transport and storage.
- Modular in design.
- No tools required for set up.
- In Built Fall Indicator.
- Light weight.
- Available in a variety of heights.
- Multi-adjustable reach and off set.
- Rotates full 360 degrees.
- BTS-Klick pin-less technology adjustment.
- Compatible with portable and permanent davit bases.

Specifications

Ultimate Strength Rating:	18 kN
Capacity (Rescue):	Max. 2 workers weighing not more than 136 kg each.*
Capacity (Fall Arrest):	Max. 1 worker weighing not more than 136 kg.*
Allowable MAF Rating for SRL's:	4kN
* Capacities quoted when used in conjunction with a man rated winch

88 DAVIT PARTS & KITS

IKAR RESCUE RECOVERY WINCHES

IKAR height safety devices with rescue hoisting facility (type HRA) are equipped with a winching unit. In case of a rescue after a fall this winch unit can easily be snapped-in by a second person e.g. in case of unconsciousness through gas in shafts or channels. The person who has suffered the accident can therefore be rescued quickly and safely. The unit is completely closed and has no wearing parts. All parts are made from stainless steel, aluminium or shock proof plastic. Different lanyard lengths ensure that a suitable device is available for every application.

IKAR height safety devices with rescue hoisting facility have a very high standard of safety using technology which has proven its excellence throughout the world.

- Complies to EN 360:2002, EN 1496:2007
- Aluminium or Plastic Housing
- Galvanized steel cable lifeline
- Certified for 1 person

DAVIT KITS

BTRENCHSAFE® RESCUE/RETRIEVAL DAVIT WITH WINCH & SHORING PANEL BRACKET KIT

The BTRENCHSAFE® Rescue/Retrieval Davit comes with Type 3 SRL & Shoring Panel Bracket is designed to be mounted on trench shoring (steel and aluminium) panels and provides users with a safe means of extraction of personnel out of trenches and ground excavations.

Certifications

- All products comply to relevant Australian Standards including AS/NZS5532, AS/NZS1891.4 & relevant Codes of Practice. Products are also certified by a RPEQ for use within Queensland.

Davit

- Manufactured in lightweight ultra strong aluminium grade T6061 and powder-coated in hi-vis orange for increased visibility on sites.
- Built in visual overload fall indicator.
- Multiple adjustable offset reach to allow greater coverage in larger excavations.
- Modular construction with no single components weighing more than 12kgs for ease of movement on a site.

Inertia Reel comes with Recovery Winch mode

- 24mts effective working length.
- Robust aluminium construction.
- Minimal moving parts allowing for reduced chance of equipment damage or component failure due to rough handling on site.

Shoring Panel Bracket

- Increased surface area of critical holding points that contacts the aluminium shoring panels to prevent puncture and piercing of panels when in use.
- Steel construction and powder-coated in hi-vis orange for increased visibility on site.
- Adjustable throat opening to accommodate shoring panels with widths of 20mm to 200mm.

Kit with Storage Box includes:

CODE	ITEM

FLOOR MOUNTED COMBINATION UNIT OF DRENCH SHOWER & EYEWASH

FLWSAFE
EMERGENCY EQUIPMENT

A hand and foot operated unit which combines eye/face wash with a deluge shower head. The unit is stainless steel, resisting corrosion and giving solid support for the shower and eyewash. Activators are easy to locate and use.

A top of the range unit with quality components throughout.

- Soft Flow eye wash heads have built in automatic pressure compensating valves to assure steady flow under varying water supply conditions. Heads have instant flip-open dust covers and built-in filter to protect the users against particles in the water flow which may be damaging to the eyes
- Flowsafe eye/face washes and showers are one of the most competitive on the market
- Stainless steel pipe will outlast most other brands
- Heavy Duty, chemical resistant Bright Yellow ABS Bowl to handle the most rugged environment
- Epoxy powdercoated Bright Yellow - easy to see

PRICE PER UNIT		All prices +GST

PVC GUIDE POSTS

Ezy-Drive plastic guide posts are designed using specifically formulated high impact, UV stabilised PVC, to withstand repeated collisions, allowing them to return to vertical after every impact.

This ensures a reduction in time and costs associated with ongoing maintenance and replacement of damaged posts, and due to its superior flexibility, the Ezy-Drive plastic guide posts minimises damage to both vehicles and posts when impacted.

PORTABOOM® is a patented, portable boom gate specifically designed for all temporary traffic and access control scenarios.

Remote control operated, PORTABOOM® allows Traffic Controllers to stand in a safe zone, removing them from the direct line of traffic

Features and Benefits:

- **Easy to operate**
PORTABOOM® is operated by a single button, remote control eliminating any confusion and minimising traffic controller error.
- **Stable yet portable**
Weighing 95kg with four solid wheels and breaks for added safety, its heavy enough for stability to withstand adverse weather and winds speeds of up to 82.8km/h yet light weight enough to easily manoeuvre.
- **Easy set up, no tools required**
The boom gate and stability legs are attached and detached with ease.
- **Fast assembly**
It takes only 5 mins to set up.
- **Longevity of battery life** - The rechargeable batteries provide up to 6,500 movements, up and down.

NEW Pedestrian Lights, Traffic Lights & Accessories also available!

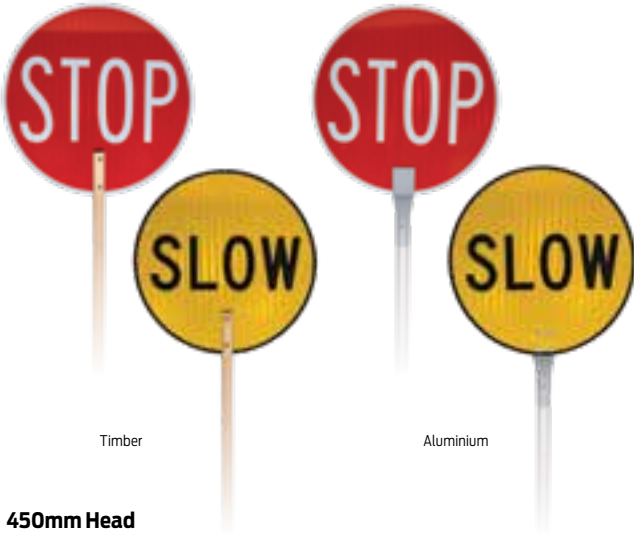

**PORTA
BOOM®**

MOBILE SPEED LIMIT SIGNS

OPTraffic variable speed limit signs (VSLs) are made to the highest quality standards in our ISO9001 certified manufacturing facility, comply to MUTCD, the extra-large full-matrix led speed signs are capable of displaying any text and graphics, allowing any speed limit to be displayed, significantly reduce the safety hazard by changing the Speed Limit in the constantly changing road conditions area, ideal for traffic management in road workers, industrial workplaces, school zones, neighborhoods and high-accident areas.

OPT fully solar powered variable speed limit signs (VSLs) are compact design and superior visible. When a motorist exceeds the speed limit, the display flashes and shows "slow down" before it arriving, it also can show motorist' speed in km/h, provides customers convenience and cost efficiency of daily traffic control.

LED VEHICLE MOUNT ARROW BOARD KIT

LED Directional Arrow Boards are high quality fully featured including:

- Low profile - only 215mm high when folded down
- Automatic dimming LED lamps (Visibility Range: 0-860m)
- Simple wiring connections between board and controller
- Aluminium black powder coated boards
- B Size Board Dimensions: 1500mm (W) x 770mm (H)
- Complies to AS4192-2006
- Suitable for mounting on Trucks & Tubs
- Power: 12V

Complete Kit includes:

LED Arrow board, Controller Module, Roof Mount Assembly, Hydraulic Actuator, Beacon Brackets & Wiring (Roof Racks & Vehicle Beacons not included)

THE PERFECT FITOUT EVERYTIME

Be prepared for Traffic Control with Jaybro's Custom Ute Package

Jaybro's Solution

Jaybro's traffic control pod turns your standard ute into a mobile traffic management kit. This traffic control fitout package is ready to add to any tray-back ute and each package is completely customisable to your needs.

It can be permanently fitted to a ute for traffic controllers needing a day-to-day signage resource, or it can be kept at your yard as a backup option or for those jobs where you need a temporary traffic control kit, without engaging the services of an actual traffic controller.

With the inclusion of an arrow board and beacons, reflective traffic cones, your choice of swing stand signs, and two stop/slow bats, it provides workers with a complete 'pod' fitout.

What's in the kit?

B-Size Arrow Board

- The 'plug n play' B-size arrow board is fixed to the top of the galvanized pod frame. Providing high visibility combined with low power consumption, its flashing beacons transform your ute into a clear and visible traffic indicator. Flashing lights on either side of the arrow board provoke motorists to merge into a different lane, thereby providing an additional level of safety for workers.
- Designed primarily for use during roadworks, it can be set to display left, right or double-headed arrows. A hydraulic lift raises and lowers the unit, and when in the lowered position, it gives minimal wind resistance.

6 Bay Galvanised Sign Rack

- The strong yet lightweight galvanized frame has six bays which neatly fit a supply of 36 swing stand signs. The galvanized rack has four cone spikes at the rear, enabling easy and secure stacking of up to 48 traffic cones.

48 Traffic Cones

- Both swing stand signs and cones are included: 700mm high traffic cones with a reflective collar are part of the package.
- Class 1 retro-reflective tape adds extra visibility in low light situations, and the heavy rubber base provides stability and prevents tipping.

Your Choice of Swing Stands

- Your choice of 36 different swing stand signs measuring 1200 x 900mm is part and parcel of the traffic control pod.
- With hundreds of messages such as 'reduce speed', 'grass cutting in progress', 'part road closed' and a huge range of chevrons and arrows, there's sure to be a series of signs that suit your particular line of work.

2 Stop/Slow Bats

- The final piece of kit is the two 450mm stop / slow lollipop bats. These Class 1 reflective bats have an aluminium handle that extends from 1.4m up to 2.4 metres, for natural and comfortable handling no matter how tall the traffic control staff are!

Kit is completely customisable to give you the ultimate traffic control package

REFLECTIVE KERB RAMP

Reflective Kerb Ramps grant safe access for vehicles and wheeled devices over road side kerbs. Recommended for use on civil and construction work sites. Effective on and around work sites for providing passageway for trolleys and wheelbarrows. The design of the ramp ensure vehicles and other devices can engage the ramp from any angle - without damage. The rounded edges and minimal incline shape allows for easy access.

- Modular section with separate ends allows for installation of longer sections
- Hi-visibility and anti-slip inserts.
- Mounting holes and cable access moulded-in.
- Heavy duty recycled rubber construction.
- Can installed with an offset from the gutter, allowing for a water / drainage channel.

**Reflective Kerb Ramp 100mm High**

PRICE PER UNIT		All prices +GST

152 TRENCH COVERS & SAFE PLATES

TRENCH COVER - INTERLOCKING

HDPE trench covers are a slip resistant trench cover suitable for pedestrian and light vehicle traffic. It is ideal for trenches, manholes, uncovered pits and uneven surfaces. Cut-out handles allow for the trench cover to be easily carried and placed wherever needed for versatility.

- Cover Size: 2000mm x 800mm x 50mm
- Cover Weight: 25kg
- Physical Performance: 15mpa
- Elongation at Break: 500%
- Material: HDPE with steel reinforcement
- Handrail Weight: 4kg each
- Handrail Size: 1000mm (H) x 880mm (W)
- Groove & Tongue linking bracket system
- Connect easily and securely together
- Handrails also available (Sold in Pairs)
- Handrails can be bolted to the cover for added safety

**(CODE 01) METAL**

0.6mm steel with 7 year weather resistant coating. Standard with rounded corners and mounting holes.

**(CODE 02) POLY**

1.6mm flexible weather resistant polypropylene. Highly recommended for outdoor use. UV stable and resists fading and cracking for up to 5 years. Poly is fully recyclable and made from 70% recycled material. Standard with rounded corners and mounting holes.

**(CODE 03) FLUTED PLASTIC**

3mm fluted plastic. Low cost alternative, ideal for temporary applications.

**(CODE 04) SELF ADHESIVE VINYL**

Outdoor heavy duty permanent adhesive vinyl. Simply peel backing paper off and apply to any clean smooth surface.

WHY POLY SIGNS ARE VALUE FOR MONEY!

- Lasts longer than flute & metal (will outlast flute up to 7 times).
- Five year outdoor guarantee.
- Flexible - won't dent or crease.
- Cheaper than metal.
- Can't be pulled off fences like flute.
- Comes with rounded corners and mounting holes.
- Easy to handle and put up no sharp corners.

YELLOW SAFETY MAN CONSTRUCTION SIGN CUTOUTS

Safety man signs are used to draw attention to overhead powerlines, pits and other hazards on site. These life sized construction worker figures help to draw attention to underground equipment and assist plant operators to more easily see where underground monitoring equipment or settlement devices are located.

Additionally, construction worker safety man figures help to draw the attention of the public and passers by, ensuring motorists slow down in construction zones and that they make the connection to the human element of construction work. This helps to keep safety front of mind in construction areas

- Material: Fluted Plastic
- Size: 1800mm (H) x 900mm (W)

168 DOCUMENT HOLDERS

PRE START WATER RESISTANT DOCUMENT HOLDER

- Manufactured from tough, heavy-duty, resistant and fire retardant fabric with reinforced mounting eyelets.
- Rip, tear & water resistant vinyl fabrics for heavy duty applications.
- All of our pre start and document holders are sealed for water resistance using high frequency welding.
- High frequency sealed seams to eliminate water and contamination to machine pre start documents, log books, first aid kits and safety tags.
- Easily attached using the 3 heavy duty eyelets to secure to equipment, vehicles and machinery.
- Fully reinforced access flap to eliminate operators not closing shut the access point.
- This will close over on its own, keeping the rain, dirt and dust away from your documents.
- Hook and loop Velcro secures the access flap from blowing open. It also features a fully zipped enclosure to eliminate water and contamination from entering the holder due to rain or from water pressure cleaning the equipment.
- A clear identification screen is heat welded to the front of the pre start document holder. Slide in your required labelling, statutory machine document cards or clear instructions regarding that equipment.
- Hi visibility fabric across the front of the pre start document holder is a visual indicator to operators where the pre start documents or logbooks are located.
- Zip opening: 270mm
- Internal depth: 270mm x Width 300mm
- External overall length: 330 mm x width 300 mm

170 GUIDE TO PRINTED FENCE FABRIC

The very best quality banners at unbeatable prices!

Jaybro provides a comprehensive range of Premium Mesh, Open Weave Mesh, and Vinyl Banner to provide site privacy and advertising for buildings, construction sites or events.

We offer a number of extra-large printing options delivering truly outstanding results in both scale and quality. No matter how big or colourful your design we can find the solution that's right for you. **And if you need help with producing a creative design – well, we can help you with that too!**

1

SELECT THE MATERIAL THAT'S RIGHT FOR YOUR PROJECT

We have 3 types of material to choose from, each has different print and durability characteristics. We recommend Open Weave Mesh if your site is wind exposed. Where you need superior privacy, print quality and durability we recommend you get Premium Mesh.

Call us at 1300 885 364 to discuss your requirements and we'll recommend the most appropriate product for your needs.

MATERIAL	CODE	STANDARD PRINT ROLL SIZES [^]	FABRIC %*	DURABILITY+	PRINT QUALITY
Premium Mesh	48-PFFP	50 x 1.6 / 1.8m	80%	3 Years	Very High
Open Weave Mesh	48-PFFOW	50 x 1.6 / 1.8m	(175gsm) 50%	1 Year	High
Vinyl Banner	48-PFFCPSB	50 x 5m	100%	4 Years	Very High

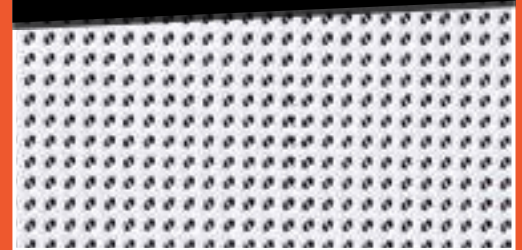

[^] Full Ink Coverage is required to print to the full area of a roll. Where this is not required, specify Block Printing to cover up to 70% of the fabric area.

* Mesh Fabric % indicates the overall percentage of printable material, the lower the percentage the more aerated the fabric.

+ Durability indicates expected life span of the banner material and print under average weather conditions but does not cover damage caused by high winds, extreme weather events or inappropriate installation.

PREMIUM MESH

Best for Privacy, Print Quality & Durability

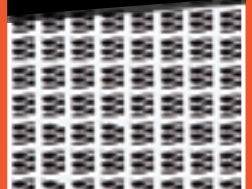

VINYL BANNER

Best for Hoarding & High Print Quality

OPEN WEAVE MESH

Best for High Wind Exposure

2

SELECT FINISHING OPTIONS FOR FIXING & FITTING

While some finishing techniques are only available with certain materials it's important to consider how your banner will be installed to determine the finishing options best for your project.

3 SUPPLYING ARTWORK SPECIFICATIONS & GUIDELINES

Whether you plan to supply us with logos and images to produce a design for you, or provide ready to print artwork, please ensure you follow our artwork guidelines to ensure we can get the best print results for your project.

SUPPLYING MATERIAL FOR US TO CREATE ARTWORK

1. Supply logos as vector files – pdf or .eps formats.
2. All images supplied as high resolution jpeg files at 10% of actual print size at 300dpi.
3. All text via email or in a Word doc file.

SUPPLYING PRINT READY ARTWORK

1. Create artwork using Illustrator or CorelDraw.
2. Set artwork dimensions to 1:10 scale (10m = 1m).
3. Maximum sizes:

All Mesh/Fabric Materials

- Trim: 50 x 2.4m (artwork: 5000 x 240mm)
- Print area: 50 x 2.36m (artwork: 5000 x 236mm)

Vinyl Banner

- Trim: 50 x 5m (artwork: 5000 x 500mm)
- Print area: 48 x 5m (artwork: 4800 x 500mm)

4. No bleed or crop marks should be set.
5. All colours to be set to CMYK (RGB or Spot colours are not accepted)
6. All images should be embedded into artwork as CMYK tif files at a minimum of 300dpi and a maximum of 450dpi. Where possible crop the images to the desired size, avoid scaling of images in the artwork program.
7. All text should be converted to paths/outlines or fonts provided with artwork.
8. All vector logos should be pasted into the artwork (image based logo files are not accepted).
9. Avoid using complex or multiple 'effects' on text or graphics. If effects are used, 'flatten layers' before saving pdf.
10. All artwork should be saved and supplied as an editable pdf at a minimum of 300dpi if images are included, ensure all text is converted to outlines.

Please note: Any provided files not set up to the required specification will be returned with amendments and comments.

1. While every attempt is made to produce your artwork to match the required colours and images as supplied, there may be some variations depending on the material you choose to print on and the scale to which you print.
2. Where a specific corporate colour is required to match precisely, a print sample can be created on request to approve prior to final printing at an additional cost. Please note that we use a CMYK printing process and matching PMS colours precisely is not possible.
3. The sharpness of images is reliant on the quality of the images you supply. We take no responsibility for the results for the quality of reproduction when images are not supplied to our required specifications.

CUSTOM PRINTED FENCE FABRIC MULTI-SIGNS

Sick of multiple signs on your fence? Sick of losing vital safety signs at your site entrance? Call today and let us design and print all your site entrance signs on one banner! **1300 885 364**

4

PROOF & PRINT QUALITY CONTROL

Once your artwork has been received we can either print it directly or provide you with a proof for your approval.

 Call our experienced customer service staff to discuss your requirements and let us fulfill your branding needs fast!

PIPE MARKER LABELS

Pipe Markers successfully identify the contents and flow of pipes allowing workers to safely trace process problems and get production back in the line faster. Pipe markers are to be located adjacent to valves, junctions, bulkheads, service appliances & wall penetrations. Markers ought to be spaced no more than 8m apart except for long, uninterrupted straight runs of external services where spacing shall not exceed 50 metres.

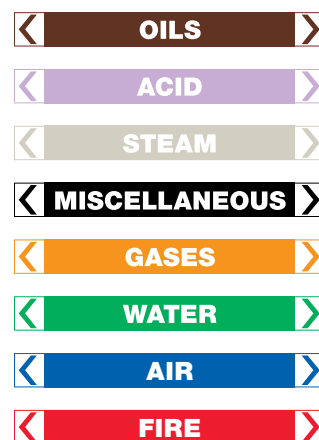

All pipe markers come in a pack of 10.

* Use in conjunction with our supplementary Safety Markers where additional information about the contents of a pipe is required.

43mm

THE PROBLEM

- Concrete bases can be heavy to lift and require 2 people.
- Concrete bases break easy and need to be replaced regularly.
- Fence feet can be a trip hazard.

POLYFOOT SOLUTION

- Extremely stable & almost unbreakable
- 2 year warranty
- User friendly - Weighs only 17kg's and can be safely lifted by 1 person
- Due to reduced weight more feet can be loaded on a truck
- Fast Installation
- Made from 100% recycled materials
- Stacks neatly

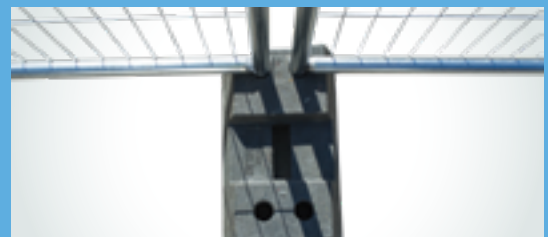

POLYBLOK QUICK TIP

Setting up fencing in high traffic pedestrian areas?

Polyblok gives you the capability to configure and transform your perimeter into a **Trip Free Zone**.

This allows for all high traffic pedestrian walkways, work zones and events to be secured without the worry of creating a trip hazard.

CONCRETE FENCE FEET

Our plastic moulded fencing feet are filled with concreted for a sturdy and robust finish, ideal for any temporary fencing application including construction fencing, demolition sites, domestic renovations and events.

182 FORTRESS ACOUSTIC CURTAIN SOUND BARRIER

FORTRESS ACOUSTIC CURTAIN SOUND BARRIER

A cost-effective solution for mitigating airborne noise, the Fortress Sound Barrier acoustic curtains are lightweight and easy to install. This product has been rigorously tested and provides a noise reduction of up to 27dB.

Each panel measures 1.3m x 2m and is constructed from a layered noise dampening materials, resulting in a tough, durable acoustic barrier that is extremely effective at attenuating noise. With Velcro strips on each long side and a neat hemmed and eyeletted finish top and bottom, the panels form a solid barrier when clipped together.

The Fortress Sound Barrier acoustic curtains are easy to fit to temporary fencing, hoarding, scaffolding and other construction walling. They are UV resistant, fire resistant and waterproof, giving them a long life span. Additionally, they can be custom printed with your brand, turning them into an effective advertising medium.

Whilst Fortress Sound Barrier acoustic curtains are easily attached to temporary fencing around construction sites, they are also effective as an indoor solution to surround particularly noisy work processes, for example in factory or production environments. Acoustic barriers are commonly used to reduce noise to pedestrians and surrounding residential areas while construction is being undertaken. Conversely, they can be used to protect workers from noise pollution in high traffic environments and noisy plant and equipment. When a series of panels are firmly attached together using the strong Velcro closures, the system forms a compliant clip together kit form noise barrier.

FEATURES

- Size: 1.3m x 2m
- Weight: approx 8kg per panel
- 27dB noise reduction
- Noise reduction coefficient (NRC) of 0.80 in absorption test
- Easily transported between construction sites
- Quick and easy to erect
- Waterproof and UV resistant material
- Robust and durable fire resistant construction
- Versatile – can be installed indoors and outdoors
- Also effective in controlling dust & fumes
- Vision panels and access doors can be incorporated
- Custom branding available
- Testing results can be provided on request

XT EDGE PROTECTION BARRIER SYSTEM

STANDARD XT BARRIER PANEL

The FORTRESS XT Barrier System™ is designed to create a protective barrier around hazards, voids, drop-offs, edges and other no-go areas, ideal for industries such as construction, excavation and crowd control. The Fortress XT Barrier System™ is easy and fast to install using galvanised steel post bolted to the ground.

This galvanised welded mesh panel is manufactured from 4mm steel wire at centres not exceeding 50mm x 50mm. Each panel features a rectangular rolled top and triangular bottom incorporating a galvanised kickplate that helps prevent objects falling through the panel bottom.

Size: (H) 1000mm x (W) 2400mm

PRICE PER UNIT All prices +GST

184 J-GUARD EDGE PROTECTION SYSTEM

Including Mesh Insert

Excluding Mesh Insert

J-GUARD EDGE PROTECTION SYSTEM

The new J-Guard Edge Protection System from Jaybro is a temporary modular edge protection system that provides the protection you need when working near exposed edges on site.

With an installed height over 950mm and the two crossbars and kickplate in place, the J-Guard Edge Protection System creates a temporary edge protection barrier tested and approved AS/NZS 4994. Unlike other systems on the market, the J-Guard Edge Protection System does not require an accredited installer, making it quick and easy to install on the go.

A series of rugged galvanized steel posts support strong RHS steel cross beams and an aluminium kickplate, forming the base of the fence system.

Then, add additional components to customise J-Guard Edge Protection System to your site. Add steel mesh panels for additional protection against dropped tools escaping the work area. Extend the safety perimeter by an additional 600mm by adding an exclusion zone bar attachment. Or, add a harness connection point to enable workers to safely access the façade.

FEATURES

- Completely modular and flexible to suit your individual needs
- Quick and easy installation – does not require a certified installer
- Can be used with or without mesh insert panels – mesh not required to make this an approved system
- Provides a 950mm high protective barrier around the perimeter of the site
- Harness connection points for additional safety
- Hi-vis yellow cross bars ensure excellent visibility on site
- Façade is easily accessed by removing only the mesh panel
- Heavy duty galvanized and powder coated steel components withstand harsh weather
- Exclusion zone extension kit helps prevent large machinery like scissor lifts from potentially colliding with the fence
- Compact packaging for streamlined freight and delivery to site
- Easy to dismantle for re-use on the next project

APPLICATIONS

- Concrete slab and formwork edges
- At the edges of pits and excavations
- Multi deck and high rise construction edges
- Edges of mezzanine floors and landings
- Around openings in floors or roof structures
- Along walkways, stairways or ramps
- Areas where floor heights differ significantly
- Additional protection when working at height

DIMENSIONS

J-Guard Panel

- 2400mm long powder coated steel crossbars
- Mesh insert panels measure 2400mm x 870 mm high
- 50mm x 50mm galvanized steel mesh
- 150mm high extruded aluminium kick plate

J-Guard U-Channel Post

- 950mm high galvanized steel square posts with fabricated U-channels
- 150mm x 250mm x 5mm steel base plate

Exclusion Zone Kit (Optional)

- 980mm x 20mm RHS steel bar with 80mm square fixing bracket
- 90mm x 45mm structural pine beam

APPROVALS

- Tested and Approved to AS/NZS 4994—Temporary Edge Protection.
- Complies to AS/NZS 4994

188 WATERFILLED BARRIERS

RAPTOR™ CRASH CUSHION

Reduces vehicle impact on Utility Poles & Trees!

Raptor® Crash Cushion is a safety device purposely aimed to reduce the impact severity of errant vehicles with a utility pole or tree. The Raptor® crash cushion has been designed, tested and accepted to **NCHRP 350 TL-1** criteria.

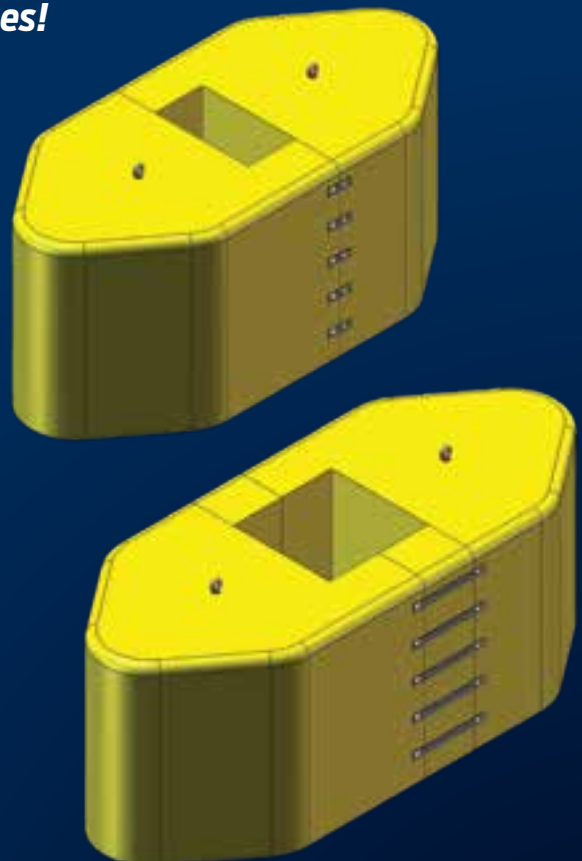

Its exceptional vehicular control and energy absorbing capabilities during end-on impacts makes the Raptor® roadway safety product an ideal solution for utility pole or tree protection. Due to its simplistic design, installation and repairs can be done under 30 minutes, promptly re-establishing roadway safety.

- Highly reduces the severity of vehicle impacts against poles and trees
- Usable in places typically impossible to protect
- Compact size and easy installation (under 30 minutes)
- Fully recyclable very low cost protection
- Material: HD Stabilised PE (UV8)

Size: Raptor 300 - 2460mm(L) x 1050mm(H) x 1150mm(W)

190 WATERFILLED BARRIERS

Crash rated to 50km/h*
Call for details

**WATER-WALL™ CRASH BARRIER**

The Water-Wall is a brand new product to Australia, crash tested to 50km/h and at only 41kg empty it is your safest choice for rapid installation and ease of handling on your next road project.

The Water-Wall barrier is manufactured from durable polyethylene plastic and has three integrally molded corrosion resistant steel cables* and six (6) bushings connecting the barrier sections to prevent vehicle breaching.

The Water-Wall barrier system recently passed MASH testing in the USA to test level 1-11 (TL-1) and complies to Australian & New Zealand Standards AS/NZS 3845.1:2015 - Road Safety Barrier Systems.

This product is designed & crash tested for use on all private, local & Council roads. Please note that this product is not approved by AustRoads for use on state road networks

- Six bushings at connection point
 - Double wall knuckle design minimizes breakage at pivoting hinge points
 - Hinge design allows for a 30-degree pivot between each of the barriers
 - Large 200mm fill hole speeds filling process, includes large 8" twist-lock plastic cap
 - New tamper resistant, corner offset drain plug with coarse buttress thread — screws in or out in only 2 1/2 turns
 - Includes one steel connection pin that allows sections to be locked together
 - Forklift and pallet jack through holes and recesses for easy movement of barriers
 - Anti-gawk Screens available
 - Weight: 41kg (EMPTY), 500kg (FULL)
- ✓ Complies to Australian Standards

192 WATERFILLED BARRIERS

Crash rated to 70km/h*
Call for details

NEW

LO-RO WATER CABLE BARRIER

New to the Australian market, the Lo-Ro water cable barrier is approved to MASH TL2 and designed for applications where low deflection is critical. Compared to competitor products on the market it has the best TL-2 deflection, shorter clear zones and shorter minimum length, saving you money and installation time whilst still providing excellent protection up to 70km/hr. Plus, the Lo-Ro has multi-speed deflection having successfully been tested to MASH TL-1.

The Lo-Ro has a stout design for maximum stability and durability. This reduces the clear zone requirement which provides an additional margin of safety for workers in the work zone. When full of water it weighs an impressive 726kg, and the lower profile 876mm height provides increased visibility for motorists in urban areas.

It is the lowest deflection MASH TL-2 Water-Filled Barrier on the market at only 3.6 metres. With three galvanized steel cables and strong interlocking knuckles between modules, it minimises penetration into the work zone. Plus, the moulded stacking lugs allow for easy storage and transport.

The SLED end treatment is approved for use with the Lo-Ro; it has been tested and passed MASH TL-2.

The Lo-Ro complies with AS/NZS 3845 and is Austroads approved, as well as being approved for use by NSW RMS, QLD TMR and SA DPTI to 70km/hr.

- Stout design for maximum stability & durability
- Lo-Ro TL-2 is designed for applications where low deflection is desired
- Reduces the clear zone requirement which provides an additional margin of safety for workers in the work zone
- Lower profile provides increased visibility for motorists in urban areas
- Lowest deflection MASH TL-2 Water-Filled Barrier at only 3.6 metres
- SLED Lo-Ro tested and passed MASH TL-2, as End-Treatment to Lo-Ro Barrier
- Interlocking knuckles minimizes rotation between modules
- Three galvanized steel cables assist with minimizing penetration into the work zone
- Moulded-in stacking lugs allow for easy storage & transport
- MASH Tested TL-2 70km/hr
- 3.6 metres deflection
- Weight 726kg when full, 72.58kg when empty
- Size: 1830mm long x 876mm high x 570mm width
- 1 year warranty from manufacture date

ANTI-GAWK SCREENS

Mesh panels commonly known as anti-gawking screens are used on civil work sites and construction sites to reduce the visibility of the sites activities to the general public and to pedestrians or vehicles passing by.

Reducing visibility on roadside work zones provides safety for road uses. Drivers often become distracted by roadwork and this can lead to hazardous situation for both drivers and workers.

Anti-gawk screens can also play an important role in promoting your business, brand or project, with the use of printed banner mesh or shade cloth which is easily attached to the mesh panels.

SPECIFICATIONS

- Suits Anti-gawk and Anti-debris applications
- Can be used with both Star Posts and Dynabolted posts
- Custom printed panels also available
- Shadecloth and Banner Mesh easily attachable
- Size: 3000mm (L) x 1000mm (H)
- Mesh: 257mm x 61.25mm, 4mmØ
- Finish: Galvanised

DELTABLOC

by Jaybro

DELTABLOC® Concrete Crash Barriers

The most exciting new product in passive traffic safety. The Deltabloc®, in both rigid and semi-rigid models, provides a new generation of concrete barriers enhancing traffic safety. These barriers are light, flexible and rigid, whilst being RMS approved to a 100km/h.

The Deltabloc® Concrete Crash Barriers are a family of fully approved and test concrete barriers. These European crash barriers encompass 15 years of engineering excellence and continual development. The Deltabloc® concept is for a safe, flexible crash barrier which can be installed in both “rigid” and “semi-rigid” methods whilst providing heavy vehicle breakdown protection and small car soft impact benefits.

- **Lightweight** As a fully approved road barrier, the Deltabloc® barriers are surprisingly light weight. At only 520kg per metre, Deltabloc® barriers are easy and efficient to transport.
- **Safe** Deltabloc® barriers are fully approved by Roads and Maritime Services to 100km per hour.
- **Quick** Deltabloc® Barriers are manufactured in 6m, 4m and 2m lengths. The unique design keeps the barrier weighed down to allow fast truck mounted crane installation.
- **Easy** The distinctive coupling design allows smooth easy assembly and disassembly.

DELTABLOC® END TREATMENTS

Absorb 350

The Absorb 350 is a water filled crash cushion that is approved to the NCHRP testing levels 1 and 2. This barrier is ideal for speed zones of 80km's and under, and it attaches perfectly to the DB80 concrete crash barriers. The system is very light weight, fast and simple to deploy making it ideal for a fast paced construction environment.

Tau-II

Fortress supports the Tau-II re-directive crash cushion these are used at the end of concrete barriers in speed zones in excess of 80Km/hr. The system is ideal in hazardous situations where traffic could be in the direct path of a dangerous median or rigid barriers. These crash cushions have met the requirements of rigorous MASH testing, meaning these deliver a fully tested, proven system.

USED DELTABLOC CONCRETE BARRIERS

Used concrete barriers for sale. Contact Jaybro today to inquire about stock availability and pricing. These second-hand concrete barriers may contain cosmetic blemishes, but are structurally sound.

These barriers can be bolted or pinned into place depending on the application. They are easy to transport, deploy and dismantle.

Used barriers are subject to availability, Jaybro stock and supply second-hand concrete barriers in various conditions and are priced accordingly

QUICK BUND

Assise® Quick Bunds can be used for the temporary storage of fuel drums, machines or leaking equipment. For use in both indoor and outdoor settings, they provide quick incidental spill containment.

- Available in 3 sizes
- 75mm wall height
- Easy to fold, transport and store

The Assise® Quick Bund was designed with storage in mind, easily rolled and stored, allowing you to respond to any incidental spill in minutes. To increase longevity of your portable containment bund, consider the use of an Assise® ground mat.

GAS BOTTLE STORAGE CAGES

Small Gas Bottle Cage

The Small Gas Bottle Storage Cage has been designed primarily as a secure storage unit for building sites and mines. The lockable gate, mesh sides and galvanised roof sheeting ensure Bottle and gear security. Forklift provision under the cage along with stacking lugs underneath for transport. The standard finish on the Cage is Zinc Plated.

- Working Load Limit (WLL): 250kg
- Unit Weight: 106kg
- Capacity to Fit: 12 x 9Kg Gas Bottles (Shelf), 6 x 18kg Gas Bottles (Without Shelf)
- Shelf Space: 540mm

Large Gas Bottle Storage Cage

- Stores up to 24 x 9kg small gas bottles (when using shelf)
- Stores up to 12 x 18kg forklift gas bottles when mid shelf is excluded
- Working Load Limit (WLL) 500kg
- Weighs 200kg
- Tamper-proof lock guard prevents cutting of the padlock by bolt cutters
- Anti-tamper gate hinges
- Sturdy construction with bump rails to protect the cage's mesh sides
- Stack 3 high when empty
- Sheet metal shelves allow easy sliding of cylinders to the back of the cage
- Sheet metal roof provides weather protection
- Forklift provision is provided under the cage for transport around the worksite
- Zinc finish for long life corrosion protection

GAS CYLINDER TROLLEY

This versatile gas cylinder trolley is designed for the safe handling of gas cylinders around the work site by forklift, crane or manually wheeled with push handles. This makes it a flexible solution on sites where manoeuvring a traditional trolley may be difficult. Designed to carry G size oxy and acetylene cylinders, it enables welders to easily move gas around site safely.

- Designed to carry one size 'G' Oxygen and one size 'G' Acetylene gas cylinder
- Ideal for use on construction and mining sites where manoeuvrability is limited
- Load binder allows cylinders to be securely fastened in position
- Fitted with push handles and 400mm diameter pneumatic tyres for manual transport
- Integrated forklift pockets and crane lifting chain sling provided
- Orange enamel paint finish
- Working Load Limit (WLL) 250kg
- Unit Weight 55kg
- Fork Pocket Size 160 x 45mm
- Fork Pocket Centres 480mm

210 EPOXY & CHEMICAL ANCHORING

FortiAnchor

FORTIANCHOR FA-E400 EPOXY ANCHOR

ETA Approved for Post installed on Rebar Connections

FA-E400 Pure Injection Epoxy is a two component non-sag, high performance, solvent-free, epoxy anchoring adhesive.

Recommended Uses

- FortiAnchor FA-E400 is ideal for anchoring rebar, threaded rod and fasteners into concrete and other substrates, including hard stone, solid rock and masonry products.

Substrates include:

- Concrete
- Hard natural and reconstituted stone
- Solid rock
- Hollow and solid masonry
- Steel
- Wood

Features & Benefits

- ETA Approved for Post installed rebar connections diameter 12mm to 40 mm
- For use in vertical down and horizontal installations
- Non-sagging in overhead applications
- Fast curing time
- Low odour, styrene free
- Ability to be used in wet/damp areas
- High load capacity

PRO-POXY 500 EPOXY ANCHOR

ETA & ICC Approved for use in cracked & uncracked concrete.

Pro-Poxy 500 is a two component non-sag high performance, 100% solids epoxy anchoring system that can be used with threaded rod and reinforcing bar in both cracked and uncracked concrete.

Pro-Poxy 500 has been tested to ICC-ES AC308, ESR-3959 and is certified to NSF/ANSI Standard 61 by ETA.

Recommended Uses

Pro-Poxy 500 is ideal for anchoring dowels, bolts, threaded rod, pins and reinforcement steel in cracked and uncracked concrete as well as other substrates including stone and solid rock.

Features

- ETA 18/0938 certified
- Anchoring threaded rod and reinforcing bar (rebar) into either cracked or uncracked concrete
- For use in vertical down, horizontal, upwardly inclined and overhead installations
- Installs in temperatures between 5°C and 40°C.
- Low VOC, with virtually no odour, styrene free

POWERS PURE150-PRO PURE EPOXY INJECTION

The Pure150-PRO is a two-component 3/1 ratio epoxy adhesive injection system.

High strength adhesive designed for bonding steel elements or post-installing reinforcement bars to cracked and uncracked concrete. Consistent performance in uncracked and cracked concrete of variable strength. Designed for use with threaded rod, internal threaded sleeve or rebar.

- ETA-option 1 approval, for use in cracked and uncracked concrete.
- Approved for Seismic loading
- F120 fire resistance approval
- QLD Transport Main Roads Approval
- Suitable for core drilled holes (diamond coring).
- Cracked concrete approval for fixing with normal threaded rods, rebar and an internal threaded sleeve.
- The approval covers threaded rods with diameters M8-M30 and rebar diameter Ø8-Ø32.
- Can be used for overhead applications
- Can be used in damp, wet or water filled holes
- It has an excellent performance in hammer and diamond core drilled holes.
- PURE150-PRO has an NSF certification according to NSF/ANSI Standard 61 for installing threaded rods into concrete or masonry for water treatment applications.
- Low odor level allowing it to be used in unventilated areas.
- Suitable for static loading
- Suitable for quasi-static loading
- Suitable for tropical wind loading
- Long shelf life of 24 months from date of manufacture

212 EPOXY & CHEMICAL ANCHORING

MEGAPOXY 36

MEGAPOXY 36 is a two component epoxy composition for bonding ceramic and reflective markers to bitumen and concrete surfaces. Megapoxy has a working time of 3 min (at 23 °C) and reaches cohesive strength in 30mins.

The advantage of the 600mL Dispensing Gun is the high efficiency and accuracy when applying to smaller objects. Also, the consistent mix at the correct ratio and minimal exposure of the product to the air means less waste product.

- Easy to use, mixes at a ratio of 1:1 Part A resin to B hardener
- Size: 600ml twin tubes.

216 ADHESIVES & SEALANTS

FULAFLEX™ 550 PU LM

One component moisture-curing low modulus Class A polyurethane sealant with excellent joint movement capabilities

Uses:

- Building joints with high movement
- Joints in pre-cast and tilt-up concrete elements
- Connection joints between windows, doorframes and walls
- Joints in brickwork, masonry and blockwork
- Perimeter fillets in waterproofing membrane systems

Benefits:

- Cures into a flexible, durable and weather resistant sealant and exhibits excellent adhesion to a wide range of substrates.
- Low in VOC (<30g/L) and satisfies the requirements for the Green Building Council of Australia (GBCA)

PRICE PER UNIT (Minimum purchase of 20 sausages)

AFTEK FLEX-PRO PU SEALANT

One component high performance construction joint, thixotropic moisture curing polyurethane sealant/adhesive with high mechanical strength & excellent resistance to weathering.

- Designed for use in construction joints & expansion joints on heavy & light pre-cast concrete panels, expansion joints in buildings, perimeter sealing around window & door frames, curtain walls & sealing of penetrations in walls, floor & retaining walls.
- Class A sealant.
- Low VOC 35 G/L
- Paintable when cured
- Joint movement total of 50% (± 25%).

FOSROC® NITOSEAL PU400 SEALANT

Tough, abrasion resistant, one component, trafficable, polyurethane joint sealant. Ideal for bonding or sealing joints between most construction materials, where a high bond strength is required.

- Suitable for use as a sealant or adhesive
- Ideal for wide floor joints
- Suitable for water immersed applications when used with appropriate primer
- Tough and abrasion resistant
- Excellent primerless adhesion
- Fast curing
- Weather resistant
- Non staining

AFTEK FAIRING COAT MORTAR

Fairing Coat Mortar is a fine textured, fast setting and formulated for repairing damaged concrete where only a thin layer is required. The specially selected cement and polymer contain Fairing Coat Mortar produce a fast setting mortar with exceptional adhesion to concrete and masonry materials with negligible shrinkage.

- Easy to use, just add water
- Fast setting
- Smooth textured surface, a smooth finish can be achieved
- High bond strength to concrete
- Can be left exposed as finished final coat
- Excellent workability
- Durable repair
- Suitable for internal and external applications

AFTEK PENAPATCH HIGH BUILD HB

High Build HB is a high strength, high build shrinkage compensated polymer modified repair mortar. Designed to be used for vertical and overhead applications.

- Easy to use, just add water
- High build repairs achievable in a single application
- Low permeability, protects against chloride attack and carbonation
- Medium strength/abrasion resistant
- Exceptional bond strength to concrete substrates
- Eliminates the need for formwork
- Suitable for internal and external applications
- Shrinkage compensated for long term dimensional stability

218 MORTAR

AFTEK CRETE BOND

Cretebond is a bonding agent for new to old concrete and as an admixture to improve adhesive and cohesive properties for site mixed mortars, renders and toppings. Suitable for use on concrete, hard plaster, compressed fibre cement sheet, plasterboard and timber. It can also be used as a woodworking adhesive when applied undiluted.

- Premium grade PVA bonding agent and admixture
- High solid content 50% joint movement capability
- Suitable for interiors and exteriors
- Water based
- Concentrated formula

PROPERTIES

Appearance	Liquid

FOSROC® RENDEROC HB40

High performance, medium weight, very low shrinkage, patch repair mortar, compatible with concrete 30 - 45 MPa.

Renderoc HB40 concrete reinstatement mortar is supplied as a ready to use blend of dry powders which requires only the site addition of clean water to produce a highly consistent, medium-weight repair mortar. It is based on Portland cements, graded aggregates, lightweight fillers and chemical additives which provide a mortar with good handling characteristics while minimising water demand. The low water requirement ensures good strength gain and long-term durability.

- Compatible with concrete strength in the range 30 to 45MPa
- Abrasion resistant - suitable for aggressive environments
- Shrinkage compensated - provides long term dimensional stability
- Low permeability to potentially damaging water, CO2 and chloride ions
- Suitable for use with Galvashield anodes
- Can be applied using wet-spray process - providing faster high build repairs
- Pre-bagged to overcome site-batched variations
 - only the site addition of clean water required
- Complies to AS/NZS4020:2005 - suitable for use in potable water

FOSROC® RENDEROC HB70

High build repair mortar, conforms to EN1504-3 class R4.

Renderoc HB70 is supplied as a ready to use blend of dry powders which requires only the site addition of clean water to produce a highly consistent, high strength repair mortar. The material is based on Portland cement, graded aggregates, special fillers and chemical additives and is polymer modified to provide a mortar with good handling characteristics, while minimising water demand. The hardened product exhibits excellent thermal compatibility with concrete and outstanding water repellent properties. The low water requirement ensures fast strength gain and long-term durability.

- Compatible with concrete strength > 45MPa
- High strength - suitable for structural repairs
- Abrasion resistant - suitable for aggressive environments
- Shrinkage compensated - provides long term dimensional stability
- Low permeability to potentially damaging water, CO2 and chloride ions
- Suitable for use with Galvashield anodes
- Can be applied using wet-spray process - providing faster high build repairs

AFTEK PENATECH GP GROUT

Aftek Penatech GP Grout is a high strength, precision Class C grout. Non shrink dual expansion compensates for shrinkage in both the plastic and hardened state.

- High early and ultimate strength
- Exceptional flow characteristics, good flow retention
- High ultimate strength (28 days)
- Shrinkage compensated in both plastic and hardened states
- Non metallic
- Can be dry packed
- Complies with ASTM C1107-91 and CRDC-621-82
- Good impact and thermal resistance

**AFTEK PENATECH HES GROUT**

HES Grout is a high early strength gain, flowable, shrinkage compensated, Class C grout for use where rapid strength gain is required. It is a blend of Portland cements, graded fillers and chemical additives which impart controlled expansion in the plastic and hardened states whilst minimising water demand and maximizing early compressive strength gain.

- Rapid strength gain and set times even at low temperatures
- Dual stage expansion compensates for shrinkage in both plastic and hardened states
- Exceptional flow characteristics and variable consistencies obtainable
- High ultimate strength (28 days)
- Equipment/machinery can be reinstated after 24 hours
- Complies with ASTM C1107-91 for expansion
- Good impact and thermal resistance

**AFTEK PENATECH HS GROUT**

Aftek Penatech HS Grout is a high strength, precision Class C grout. Non shrink dual expansion compensates for shrinkage in both the plastic and hardened state.

220 GROUT

SIKA® GROUT 212 HP

Sika Grout 212 HP is a blend of Portland cement that achieves high strengths in short times, making it suitable for grouting fixing bolts and anchors or bedding machinery in the most demanding of circumstances.

- Non shrink
- High early strengths
- Good flow characteristics
- Adjustable consistency
- Does not segregate or bleed
- Good impact and thermal resistance
- Non corrosive to steel or iron
- Lab tested in accordance with AS 1478.2

AFTEK TRULEVEL ECONO PRO

Tru Level Econo Pro is a specially formulated floor levelling compound designed to achieve a smooth flat surface for application of carpet, tiles, vinyl and floating floor systems.

- Foot traffic ready in 3-4 hrs
- Floor covering ready in 24 hrs
- Can be applied 2-30mm in a single application
- Large area can be reinstated in relatively short time periods
- No cracking or delamination
- Eliminates the need for sand/cement screeds
- Ready to use, just add water
- Suitable for commercial, domestic and light industrial applications

222 FORM RELEASE AGENTS

LANOTEC® RELEASE AGENT

A concentrated, lanolin-based concrete release agent. Formwork, precast, tilt panel concrete release agent derived from natural, sustainable ingredients.

- Breaks concrete bonds
- Protects tubes, jacks and fittings from corrosion
- Lubricates jacks and fittings
- Extends the life of timber and metal moulds
- Protects equipment from concrete and paint overspray
- Safe for use on PVC, fibreglass, polypropylene, rubbers and polystyrene

PRIMERS

CALFORM CREAM FORM PRIMER

Primer and conditioner for protection and preservation of sawn timber, pressed wood and other absorbent forms for architectural concrete. It is recommended all new forms of smooth timber, sawn timber, pressed wood sheets, rope and any porous material to be used for concrete forming

- CALFORM CREAM penetrates deep into new form work, prevents distortion of forms.
- It resists the transfer of splinters into concrete from sawn forms.
- NOTE: CALFORM CREAM is a form primer, NOT a FormRelease Agent

AFTEK CURECON A

CURECON A acrylic, water based curing compound is a Class D, Type 1 curing compound for use on new concrete that facilitates maximum moisture retention through the curing period to maximise concrete strength & durability. Curecon A is certified to comply with Australian Standard AS 3799.

- Reduces the likelihood of surface cracking or dusting
- Easy to use, eliminates messy water curing or polythene film
- Complies with Green Star Office Design V3 IEQ-13
- Low odour, no ventilation requirement
- No stringent safety requirements

PROPERTIES

AFTEK CURECON AA

CURECON AA is a water based, aliphatic alcohol finishing compound designed for use on plastic (freshly poured and screeded) concrete, to reduce the evaporation of water during finishing operations. CURECON AA will not normally interfere with subsequent toppings, tiling, render, surface coatings etc. that are often used in industry.

Please note: Curecon AA is NOT a curing compound.

- Water based
- Reduces shrinkage cracking by slowing the evaporation of water from the concrete surface
- Improves finishing properties in adverse weather conditions
- Does not interfere with following trades

PROPERTIES

Appearance	Blue Liquid, Dries Clear
Dilute Curecon AA:Water	1:9
Application	Spray
Coverage per Litre	5-7m²

AFTEK CURECON W RESIN

Curecon W is a Type 1D, Class B, hydrocarbon based resin curing compound, used to retain moisture in concrete for effective curing. Used for all concrete but specifically designed for use in mass concrete structures such as road work, bridgework and runways. Curecon W is certified to comply with Australian Standard AS 3799.

- Reduces surface shrinkage and cracking by eliminating moisture loss from exposed surfaces.
- Volatile ingredients comply with air pollution requirements of photo-reactive compounds
- Increases concrete strength & dusting resistance
- Rapid film formation and tack free when dry
- Green Star rating, complies Office Design V3 IEQ-13
- Eliminates the need for damp hessian, sand or polythene

PROPERTIES

AFTEK CURECON BE

Curecon BE is a Class Z, Type 3, water based bitumen membrane curing compound used to retain moisture in concrete for effective curing. Curecon BE can be used for all concrete but is specifically intended for use in mass concrete structures such as roadwork and bridgework, on/off ramps and airport runways. Curecon BE is certified as compliant with the Australian Standard AS3799-1998.

- Reduces surface shrinkage and cracking by eliminating moisture loss from exposed surfaces.
- Rapid film formation resists wash off by rain about 30 minutes after application. Tack free when dry.
- Use as a pre-coat for finishing with an asphalt black top surface
- Increases concrete strength and dusting resistance
- Meets Low VOC formulation

PROPERTIES

Appearance	Dark Brown Liquid, Dries Black
Drying Time (25°C)	25-30 mins
Coverage per Litre	5m²
Water Retention Efficiency	>90%

AFTEK CURECON PW SMARTWAX

Curecon PW is a Class A water based wax curing compound used to retain moisture in concrete for effective curing. Used for all concrete but specifically designed for use in mass concrete structures such as roadwork, bridgework, civil construction and runways. Curecon PW Smartwax dries rapidly and becomes resistant to wash off in about 15 minutes after application.

- Reduces surface shrinkage and cracking by eliminating moisture loss from exposed surfaces.
- Increases concrete strength & dusting resistance
- Rapid film formation
- Shower resistant at 15 minutes
- Meets Green Star rating complies with Office Design V3 IEQ-13. Low VOC, non-flammable; non toxic.
- Eliminates the need for damp hessian, sand or polythene

PROPERTIES

Appearance	Pink Milky Liquid, Dries Clear
Drying Time (25°C)	15-20 mins
Application	Spray/Roller

224 CURING COMPOUND & RETARDER

SIKA® RUGASOL® C

Rugasol C is a liquid retarder for horizontal construction joints and surfaces for use in cooler conditions or low retardation conditions. Rugasol C is an easy to use, economical product applied to obtain a mechanical key for "kicker" joints, renderings and screeds on horizontal surfaces of freshly placed concrete.

- Rugasol C can provide decorative finishes to concrete and can be used in conjunction with many natural aggregates.
- It can provide an exposed aggregate finish leaving excellent anti-skid properties.
- Rugasol C leaves an excellent key for further concreting, screeding or rendering.

PRICE PER UNIT

All prices +GST

CODE	SIZE	10 +	5 - 9	1 - 4
40-493043	Rugasol C 10L	\$42.85	\$48.50	\$56.15

**SIKA® RUGASOL® 90**

Rugasol 90 is a specially formulated liquid surface retarder for summer condition. Rugasol 90 will cause retardation to the surface of the freshly laid concrete, and will result in an exposed aggregate type finish.

- Rugasol 90 can be used undiluted or in diluted version, depending on the degree of the surface penetration required.
- Depth of penetration is controlled and constant.
- Surface retardation of up to 24 hours can be achieved.
- Extremely cost effective.

PRICE PER UNIT

CODE	SIZE	10 +	1 - 9
40-493044	Rugasol 90 10L Yellow	\$33.80	\$44.00

**SIKA® RUGASOL® MH**

Rugasol MH is a gel retarder used mainly for on site exposed aggregate work. Rugasol MH surface retarder is used to expose aggregate on formed Portland cement based concrete surfaces, both vertical and horizontal.

- It can provide a decorative architectural finish to precast or insitu concrete surfaces.
- Can be applied to most type of clean formwork such as steel, timber, plywood, etc.
- Can be used in conjunction with Rugasol® C to provide constant aggregate
- Exposure to both vertical and horizontal surfaces.

**FOSROC® CONCURE A99**

Water based acrylic curing compound - conforms to AS3799.

Concure A99 is a liquid acrylic emulsion membrane curing compound, which when applied to fresh concrete dries to a transparent film of high water retention enabling curing of the concrete by reducing loss of water from the concrete

PRICE PER UNIT

All prices +GST

CODE	SIZE	5 +	1 - 4
40-FC600909-20L	20L	\$292.80	\$313.15

**FOSROC® CONCURE WB30**

Water based wax emulsion, curing compound - conforms to AS3799.

Concure WB30 is a low viscosity wax emulsion which incorporates a special alkali reactive emulsion system. This system ensures that the emulsion forms a non penetrating continuous film immediately upon contact with a cementitious surface. This impervious film prevents excessive water evaporation which in turn permits more efficient cement hydration thus reducing shrinkage and increasing durability.

HYDROTITE - HYDROPHILIC CHLOROPRENE RUBBER WATERSTOP

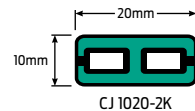

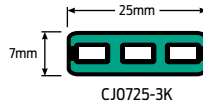

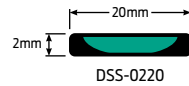

ADVANTAGES

- Easy to handle and install
- Excellent adhesion to concrete surfaces
- Outstanding physical properties
- Profiles with self-adhesive backing allow for simple and fast installation processes
- Co-extruded design means expansion is directed across the joint for maximum seal
- Unaffected by repeated wet and dry cycles
- No site welding is required for joining processes
- Has a delay coating to help prevent premature expansion
- Extra delay coating is available for very wet conditions, if required
- Changes colour as a visual alert to let you know it has expanded
- No need for special intersections, joining is by simple butt joins
- Can be applied to rough surfaces using Leakmaster gun grade waterstop
- Can be joined to traditional PVC waterstop
- No compaction or displacement problems
- Non toxic and non hazardous

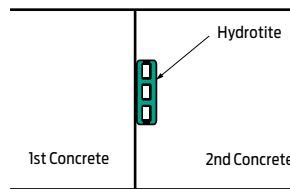

AREAS OF APPLICATION

- Sewerage Treatment Plants
- Water Treatment Plants
- Reservoirs
- Water Tanks
- Swimming Pools
- Tunnels
- Subway Stations
- Basements
- Pits
- Pipe Penetrations

After Expansion

SUPERSTOP 47B - HYDROPHILIC BUTYL WATERSTOP SEAL

Superstop® 47B Hydrophilic Butyl Waterstop Seal is a unique sealing compound which expands in a controlled fashion when exposed to moisture, forming a compression seal in concrete joints. Superstop® 47B is ideal for use in horizontal and vertical construction joints for cast in-situ concrete structures. 60m head of water pressure.

AREAS OF APPLICATION

Water Retaining Structures

- Water tanks
- Reservoirs & Dams
- Spillways
- Sewage treatment plants
- Water treatment plants
- Swimming pools
- Box culverts
- Bund walls

Water Excluding Structures

- Basements
- Underground structures
- Tunnels
- Subways
- Retaining walls
- Pits
- Manholes

Others

- New to old concrete
- Underground structures
- Poured in-situ construction joints
- Roof slabs
- Suspended slabs
- Above & below grade precast panels (check with Concrete Jointing Systems & your Engineer)

LEAKMASTER - HYDROPHILIC GUN GRADE WATERSTOP

Leakmaster LV-Z is a one component polyurethane water-swelling sealant with excellent and unique physical properties. Its development was based on our technology and experience in water-swelling sealants.

It can be applied to places such as joints, etc., in civil engineering construction and water services for seals where conventional solid sealants cannot be applied easily. After hardening, it has excellent physical properties together with rubberlike elasticity and water sealing properties.

J-SEAL PUI-800

J-Seal® PUI-800 (PG) is a one-component, polyurethane, concrete pavement self-levelling sealant. It cures under the influence of atmospheric moisture to form a permanently elastic sealant with excellent adhesive properties and resistance to ageing and weathering.

J-Seal® PUI-800 (PG) is developed to avoid bubbling which can be present in traditional one-part PU Sealants and combines the best properties of traditional polyurethane sealants and providing very low emissions.

Available in grey - also available in black or white.

ADVANTAGES

- One part - no mixing on site, self-levelling consistency
- Bubble-free curing
- Resistant to hydrocarbons, oils, fuels and pitch-free
- Very good adhesion on all typical construction materials
- Primerless adhesion on green concrete
- Permanently elastic over a wide range of temperatures; accommodates joint movement of ffl 25%
- Non-staining

AREAS OF APPLICATION

- Joints in rigid pavements of airports and concrete roads
- Joints in concrete floors
- Indoor and outdoor applications for pedestrian and traffic areas (petrol stations, decks, car parks)
- Floor joints in warehouses and production areas
- Joints in waste water treatment plants Floor joints in tunnel construction

Jointflex 25

CORK EXPANSION JOINT - SELF EXPANDING CORK

Resin Bonded Cork Fillerboard is a cork-based material that expands within concrete joints to provide permanent protection. Cork is a natural product from the bark of the cork oak tree which is stripped, washed and treated. It is then granulated, mixed with resins and compressed into blocks.

After the manufacturing process is completed, it is then cut to size and shape to suite your requirements. Being a natural based product, it has the ability to withstand a variety of environmental and climatic conditions. As concrete expands and contracts during daily climate and temperature changes, it automatically adapts to the conditions and prevents your concrete from bursting or cracking.

Used for

- Heavy Duty Concrete Pavement
- Airports
- Freeways
- Highways

SIKATITE® BE BITUMEN WATERPROOFER

SikaTite BE is a water based bitumen emulsion modified with acrylic latex polymers. It can be applied as a waterproof membrane, sealant, protective coating or adhesive. It is designed for use underground, internal and immersed areas.

- Water based, free of solvents and toxins
- Can be used in varying thicknesses
- Excellent bonding capabilities
- Can be applied to damp surfaces
- Can be mixed with sand/cement to improve adhesion, tensile strength, flexibility, sound dampening and to create falls.
- Can be painted or coated over
- Approved for use in potable water (AS4020:1999)
- Easy to apply and work with
- Can be applied to a wide range of substrates
- Size: 15L

230 CONCRETE REMOVER & CONCRETE WASHOUT BAGS

CONCRETE WASHOUT BAGS

The Concrete Washout Bag provides a quick and convenient solution to contain all concrete washout waste. The bag is simply placed under the chute or hopper and the slurry is contained in the plastic/polyethylene inner liner in the bag.

The bag is forkliftable with built in loops for safe and easy transportation to an offsite location. It is strong enough to withstand heavy loads and is tested to a load rating of 2470kg. All bags are fully tested and compliant with Australian Standard AS3668-1989.

Once set, the Concrete Washout Bag and its contents creates a versatile secondary product to use for car park walls, low retaining walls or designated compounds. The bags are perfect for use in applications such as: Civil Construction, Road Construction, Commercial Construction

- Size: 175cm L x 104cm W x 37cm H
- Capacity: 0.70 cubic metres
- Max Load: 2470kg
- Complies to AS3668-1989

LIQUID HAMMER CONCRETE REMOVER

Liquid Hammer is non corrosive, biodegradeable and safe to use on virtually all surfaces. Liquid Hammer can remove concrete, cement, grout, hard water deposits, mortar, plaster, lime and scale buildup- from small machines, bathrooms all the way to large machinery and buildings. The unique formula is absorbed by the concrete surface and breaks it back down into a paste that you can brush or wash off.

- Liquid Hammer is non-corrosive, so it's user and equipment safe.
- The unique formula is absorbed by the concrete surface and breaks it back down into a paste that you can brush or wash off.
- Clean concrete and mortar off your tools, machinery vehicles - AND DO IT SAFELY!
- 100% Biodegradable

244 CONTAINMENT MESH, SHADECLOTH & NETTING

FRC FIRE RETARDANT CONTAINMENT MESH

Fire-Retardant Containment Mesh is a unique design and patented fire-retardant containment system used to enclose scaffolding from the inside. It is used to prevent falling objects and provide safety for workers using the scaffold at height. This product has been extensively tested against similar products on the market and has shown to be stronger and lighter. FRC-MESH Gen1 has a flammability index of 8, while FRC-MESH Gen2 has a significant decrease with a flammability index of 2.

- Fire-retardant containment system
- Significant saving in labor installation and dismantle times
- The wire is eliminated completely with no wire tangles or lacerations
- Reduction of trip hazards
- Decreased product weight compared to chain and shade system
- Highly durable, can be re-used multiple times
- Easy to use
- Can be cut and shaded easily

246 MAX FRANK FORMWORK SYSTEMS

MAX FRANK STREMAFORM®

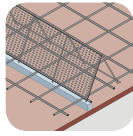

Stremaform® flat is used for medium-sized structural components, installed between the upper and lower reinforcement layers. Stremaform® in the concrete gives a rough surface that satisfies the requirements of an indented joint according to DIN 1045-1 and/or Eurocode 2 and does not need scabbling. A metal water stop or a pvc/rubber waterbar support cage can be integrated in our factory if required. Delivery is made precisely in accordance with your layout specifications.

Stremaform® formwork elements are used as lost formwork in floor slabs, ceilings and walls. The expanded metal that is welded between the bars of a specially designed reinforcing steel mesh gives rise to a rough surface. The reinforcement can be continued without a break into the second concrete pour.

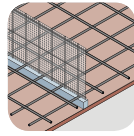

- Stremaform® is suited for all types of working joints.

**MAX FRANK PECAFIL®**

Pecafil formwork saves you time and takes the hard work out of construction. Pecafil is the tried and tested solution for today's construction professionals. The specially manufactured material is constructed from a steel mesh in a wide range of sheet and strip sizes with various wire diameters, shaped to meet your needs. Its distinctive yellow outer layer is heat-shrunk polyethylene, made from non-toxic, naturally occurring hydrocarbons.

Pecafil replaces conventional timber or steel shuttering for the in-ground construction of pile caps and ground beams, to provide fast and accurate formwork installation. Pecafil is suitable for a range of applications, using standard or custom-manufactured elements.

Benefits include:

- Site drawings are quickly transformed into factory produced panels
- A wide range of standard and bespoke panels and forms for virtually all applications
- Saves time and costs on blinding, labour and spoil removal
- Curved or complicated foundation forms can easily be produced on-site
- No stripping, cleaning or return of the formwork
- Light enough for just one person to handle
 - no need for hoists, ready for rapid assembly
- Fast and easy to install – can be cut with basic tools
- Re-use your Pecafil forms, depending on the specific site conditions and construction method – no waste
- Reduced working space requirement

MAX FRANK FIBRE CONCRETE SPACERS

Getting the right amount of concrete cover is essential for the durability of reinforced concrete structures. Fibre concrete spacers ensure correct concrete cover before and during concreting. They are characterized by high compressive strength and excellent chemical and physical resistance.

Spacers made of extruded fibre-reinforced concrete are dimensionally accurate and have a constant high quality and outstanding chemical and physical resistance. The good bond with the structural concrete prevents the formation of hairline cracks. Spacers made of fibre-reinforced concrete fulfil the requirements of all exposure classes. All concrete mixes used have been tested by independent testing institutes with regard to the required properties

Advantages:

- High density with low porosity
- High load-bearing capacity
- Same material properties as the structural concrete
- Excellent bond with the structural concrete, no hairline cracks

Bar Spacers

- High compressive strength, no deformation in heat or cold, concrete cover accurately maintained.
- Ideal for impermeable concrete, no hairline cracks between the spacer and the concrete
- Large support area- reduced pressure on the formwork
- Substantial labour cost savings due to rapid and simple laying
- Fire resistant to the highest requirements specified in EN13501-1:2002 - Class A1 (non combustible)
- All bar spacers over 330 mm long have increased resistance to breakage due to a reinforcing thread.

Block Spacers

- High compressive strength, no deformation in heat or cold, concrete cover accurately maintained.
- Spacers remain in position during formwork erection and concreting
- Ideal for impermeable concrete, no hairline cracks between the spacer and the concrete

Call for pricing

Shear Force Dowel Egcodorn®

- The Egcodorn® shear force dowel transfers maximum loads whilst having a minimal component thickness and is mainly used for static loads.
- Our Egcodorn® range offers numerous standard types. Also using our modular component system it allows you to combine various components according to your specific requirements. The use of high quality materials and the unique corrosion protection system guarantee the highest safety and reliability.

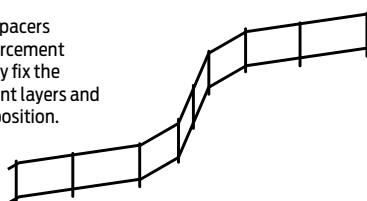

Stabox® S

- Stabox® S standard reinforcement connection meets the highest transverse force requirements for an indented working joint. Practical example of the formation of a concrete working joint with rebendable reinforcing steel in a reinforcement box when building a vehicle ramp

U-Korb® Steel Spacers

- Continuous high chairs are used as spacers between the lower and upper reinforcement layers in bases, slabs and walls. They fix the distance between both reinforcement layers and hold them in the correct structural position.

CPF Liner Zemdrain®

- The controlled permeability formwork (CPF) liner Zemdrain® drains the water from the edge concrete. This makes it harder, denser and more resistant, which significantly increases the service life of the concrete surface.
- Zemdrain® non-woven liner lends concrete the following properties

248 ANCHORS, SCREWS & BOLTS

BLUE-TIP SCREW BOLTS

- ETA approved for cracked and uncracked concrete
- ETA approved for seismic loading
- ETA approved for redundant non-structural applications (6mm)
- F120 fire rated
- Ratchet teeth on the underside of the hex washer head lock against the fixture
- Removable and vibration resistant
- Low installation torque
- Fast installation with Immediate high strength loading
- No expansion forces
- Can be installed closer to the edge than traditional mechanical anchors

SLEEVE ANCHORS - ZINC

- Pre-assembled Carbon Steel single unit sleeve anchor
- The Sleeve Anchor diameter is the same as that for the hole which eliminates layout or hole spotting.
- Hex nut head style anchors consist of a threaded plow bolt which has a cone shape at the bottom end.
- Precision stamped tubular expansion sleeve
- Can be used in concrete, block, brick, and stone.
- Coating: Zinc Yellow

HOOP IRON, BUTT HINGES & HOOKS

HOOP IRON (BUILDERS STRAPPING)

- Used in the building and construction industry and is suitable for a wide variety of bracing applications. This product can be used for tie-down and other joints in timber-framed construction.
- Easy to use as steel bracing for roofs, walls ceilings and floors.
- Finish: Z275 Galvabond

256 SDS DRILL BITS & CHISEL BITS

SDS PLUS DRILL BITS

- Smooth, Effortless Drilling in Concrete
- Breaker Points: 3 offset aggressive power breakers which produce a "Demolition" effect and create micro cracks in the drilled material. Up to 25% FASTER.
- Centering tip: Ensures immediate spot drilling with pin point accuracy. Prevents skidding on smooth surfaces.
- Enlarged rebar chamfers: Prevents side tip damage when hitting rebar. Reduces the risk of the drill bit jamming when hitting rebar.

264 SPIRIT LEVELS, TAPE MEASURES & WHEELS

STABILA TYPE 81 S SPIRIT LEVEL

- Compact, tough, cast aluminium profile.
- Slender, trapezoidal profile shape for an optimum, easy grip.
- With a length of only 25 cm, the torpedo spirit level is ideally suited for applications in cramped conditions.
- Includes belt pouch

PRICE PER UNIT		All prices +GST
CODE	DESCRIPTION	1+
40-81SM	Stabila 25cm Magnetic Level & Holster 81SM	\$63.95

STABILA TECH 196 ELECTRONIC IP 65 SPIRIT LEVEL

- Electronic spirit level with an ultra-rigid aluminium rectangular profile and two integrated electronic modules for the instantaneous measurement of inclinations, slopes and angles.
- Optimum protection: waterproof and dustproof in accordance with protection class IP 65 – the spirit level can be completely washed.
- Digital displays that can be read easily regardless of application conditions and illuminated at the touch of a button.
- Acoustic guidance with 3 different audible signals to align components quickly without having to look at the spirit level.
- Digital display rotates in reverse position.

PRICE PER UNIT		All prices +GST

BOSCH LASER MEASURES

Measuring tools from Bosch offer outstanding precision and the greatest ease of use. Due to their robustness, the digital measuring tools guarantee the most accurate results also in day-to-day construction site applications – whether it be levelling, measuring distances, angles and inclines, or detecting all different kinds of materials.

NEW

Laser Range Finders

- Easy and Fun - Colour display for high user intuition
- Precise - Measuring range of up to 50, 100 or 250 metres
- Versatile - 2-in-1 distance and inclination measurer

FLEXTOOL STEEL FLOATS

- Steel Floats or "Sides Up" trowels as they are sometimes referred to are used for creating a non-slip finish on the concrete surface, also known as a stippled or coved finish. They are also used for trowelling dry shake materials into the top surface of the concrete. Steel floats produce a finer texture to wood floats and are more durable and longer wearing due to their solid steel blade. Available with ProSoft rubber handle for user comfort.

PRICE PER UNIT		All prices +GST		
CODE	DESCRIPTION	20 +	10 - 19	1 - 9
40-FT42009S-UNIT	Flextool Stainless Steel Float - ProSoft Handle 160x210mm	\$20.35	\$21.80	\$24.50

FLEXTOOL KNEELING BOARD

- Heavy duty foam for protection and comfort
- Can be used for various applications where kneeling is required
- Size: 350mm x 490mm

PRICE PER UNIT		All prices +GST

TEMPORARY SITE POWER BOARDS

Temporary site power boards deliver safe and reliable temporary power to construction and demolition contractors on site, where no existing usable power source exists. Available in a range of outlet configurations, these portable electrical boards come with 10A or 15A outlets in single phase or 3 phase versions, and are fully compliant with compliant with:

- AS/NZS 3000 Electrical installations (Australian/New Zealand Wiring Rules)
- AS/NZS 3012:2010 Electrical installations: construction and demolition sites
- AS/NZS 61009 Residual current operated circuit-breakers with integral overcurrent protection

This provides the electrical contractor peace of mind that they are satisfying their regulatory requirements. With highly visible and lockable orange powder coated housings, these temporary electrical power boards help to ensure safe connections on site.

Temporary Indoor Power Board with 6 Outlets

- Auxiliary socket outlet panel (ASOP) supplied with 6 individual 10A plug outlets
- Designed for indoor use. IP22 rated box protects against objects larger than 12.5mm, and dripping water up to 15 degrees from the vertical
- Steel enclosure powder coated in X15 orange ripple finish
- Prewired and labelled (no neutral and earth bar fitted – includes earth stud)
- Wall mountable design
- 20A 30mA 2P RCD - residual circuit breaker with overcurrent protection
- Supplied with padlock for circuit breaker
- Dimensions: 460mm wide x 235mm high x 100mm deep

PRICE PER UNIT		All prices +GST

WELDING RODS (ELECTRODES)

An electrode producing tough and crack-free welded joints and also suits welding steels with a carbon content of up to 0,6 %. The weld metal has a very low hydrogen content and is resistant to ageing.

Electrode approved for rail joint welding and with very good gap-bridging properties. Owing to its double covering (up to 3.2 mm) this electrode features a stable and concentrated arc and is therefore well suited to positional welding.

Suitable to use in welding of dynamically loaded machinery, steel construction, bridge, pipe and pipeline construction, tank, pressure vessel and shipbuilding. Welds are of X-ray quality.

- All Position
- Stable Arc
- Minimal Spatter
- Easy to Control Weld Deposition
- Easy Slag Removal

308 PIT LIDS & LID LIFTERS

COMPOSITE PIT LIDS

Jaybro carries a range of CUBIS Systems pit lids, fitting within the preformed rebate at the top of the pit or pit riser. Pit lids sit flush with the top of the pit making it strong and safe. Our pit lids come in electricity, communications, Telstra and Optus, in all sizes.

- Equipped with Radio Frequency Identification (RFID)
- Telstra, NBN & TPG Approved
- Class B load rating - AS/NZ 3996
- Lightweight to meet OH&S requirements 20kg (P5) and 25kg (P6-8-9)
- UV Stabilised
- Highest slip resistance rating against AS 4586
- Abrasion - wears at 50% rate of concrete
- No moisture absorption
- Will not float
- Can be found with a metal detector if required

PRICE PER UNIT

STANDARD COUPLING (VSC)

Constructed from the highest quality elastomeric rubber, the standard coupling provides shear resistance under heavy earth loads and is bolstered by stainless steel tension bands that create a leak proof seal.

All couplings comply with BS EN295-4, WIS 4-41-01 and BS EN16397 standards.

Suitable for Sydney Water Networks.

HEAVY DUTY PLASTIC STEP IRONS

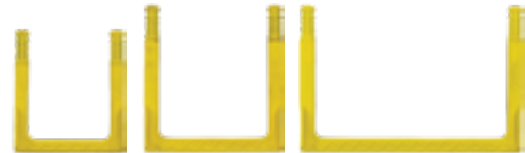

For use in sewer, communication & water, concrete drainage manhole pits. Manufactured from high strength steel bar & fully coated in yellow plastic with a non-slip tread, this makes them durable, visible & anti-slip.

Tested in accordance with AS4198-1994, with an ability to withstand 180kg in tension pull-out position & 360kg in cantilever bending, with no affect.

FORT-I-PAC SUBMERSIBLE PUMPS

Applications include: site de-watering, basement and sump drainage, fountains and water features, horticulture, aquaculture, grey water transfer, trade waste disposal, water transfer, aeration of wastewater and abrasive water removal.

- Discharge port 50mm
- Side discharge
- Stainless Steel motor base
- Cast iron body
- Auto operation with float switch
- Spiral design to pass sand, silt and other solids
- 12 month warranty

322 GEOTEXTILES

GEO MASTA™

MASTATEX™ NonWoven

mastaTEX™ NonWoven is a continuous filament geotextile made from highly durable virgin polyester fibres, which are resistant to all naturally occurring soil acids and alkalis.

The textile is formed through needle punching in order to produce a product suitable for use in road & rail work, separation, drainage, protection and filtration works.

mastaTEX™ NonWoven geotextiles are manufactured to ISO 9001 quality assurance procedures. Properties of mastaTEX™ NonWoven geotextiles are averages derived from in house and independent laboratory testing overtime.

MASTATEX™ FiltaFab

mastaTEX™ FiltaFab is a high quality staple fibre geotextile, designed for landscaping and small civil works. Due to the 3 dimensional structure, it provides an effective drainage material both through the pores, or within the fabric itself. mastaTEX™ FiltaFab is most commonly used as a filtration layer in trenches, as a pipe and aggregate wrap or behind retaining walls. mastaTEX™ FiltaFab is not approved to be used on road or railways due to the mechanical properties of a short fibre material.

MASTA^{TEX}™ Orange

mastaTEX™ Orange is a high quality staple fibre geotextile, designed for separating contaminated and non-contaminated soils. Due to its bright Orange colouring, mastaTEX™ Orange is most commonly used as a warning layer in areas which are liable to future excavations. mastaTEX™ Orange provides the same performance as other geotextiles in the mastaTEX™ range

StrabaTex Road Tape

strabaTEX™ Road Tape is a non-woven polyester geotextile which is laminated onto a bitumen compound polymer. It is resistant to high temperatures allowing hot asphalt to be laid directly onto the product. strabaTEX™ Road Tape has exceptional adhesion to bitumen and concrete.

Its flexibility along with its self adhesive composite membrane, high tensile strength as well it's puncture and heat resistance define it as the best solution in treating road and bridges. It is used to treat cracking in road pavements and can also be used to seal concrete culvert joints.

MASTAGRID™ Poly

mastaGRID™ Poly is an engineered polypropylene geogrid designed for soil stabilisation, separation & reinforcement applications. This is done through the process of extruding, polypropylene sheets then both stretching in both longitudinal and transverse directions.

mastaGRID™ Poly rigid biaxial geogrids perform best in granular, angular fills and are used under roads, railways, loading platforms for sub-base soil reinforcement & stabilisation.

CODE	STRENGTH (KN/M)	GRID TYPE	MATERIAL	APERTURE SIZE (MM)
GGPB3030	30 / 30	Rigid Bi-axial	Extruded Polypropylene	34 x 34
GGPB3030L	30 / 30	Rigid Bi-axial	Extruded Polypropylene	65 x 65

GGPB4040L	40 / 40	Rigid Bi-axial	Extruded Polypropylene	60 x 60

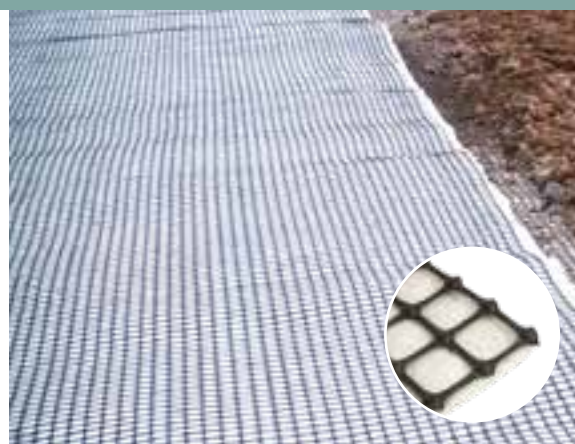

MASTAGRID™ Composite

mastaGRID™ Composite is an engineered geogrid designed for soil stabilisation, separation and reinforcement applications. **mastaGRID™ Composite** is manufactured from Polypropylene through the process of extruding, longitudinal and transverse heat stretching. **mastaTEX™** is then heat bonded to the grid to form a sound composite structure.

It is designed to prevent reflection cracking, water damage and improve load capacity in road construction and renovation. It has the property of high temperature resistance and anti-fatigue cracking and therefore extending the life and time of asphalt pavements.

CODE	STRENGTH (KN/M)	GRID TYPE	MATERIAL	BOND TYPE
GGCB3030	30/30	Rigid Bi-axial	Non Woven PET Filament	Thermal
GGCB4040	40/40	Rigid Bi-axial	Non Woven PET Filament	Thermal

EROMASTA™ SeedMat

EROMasta™ SeedMat is a synthetic turf reinforcement mat, designed and engineered to protect soil from erosion and provide an environment that encourages rapid vegetative root development. It is a three dimensional tri-layered mat manufactured from polyethylene. It is constructed using a base of high tensile layers of net bonded to upper layers to form a cusped surface designed to trap soil particles and seeds.

EROMasta™ SeedMat creates an immediate and long term defence against natural erosion due to wind, rain and flooding. Top soil and seed is applied on top of **EROMasta™ SeedMat**.

Synthetic erosion mats and blankets have become a practical choice for cost efficient, immediate and permanent solutions to help stabilisation and control erosion. **EROMasta™** products offer ecologically sensitive substitutes to alternate solutions.

CELLGRIP™ ANCHOR PIN

Secures and stabilises geocells in TRP and slope stabilisation applications.

- Eliminates time & labor associated with carrying, deploying and hammering traditional J-hooks
- Clips into the perforated side walls of the Geocell
- Superior performance when compared to traditional rebar J-hooks, up to 9x the pull out force versus J-hooks
- Can be installed to full depth without damaging the Geocell
- Quick and easy to install with a standard electric drill which results in 5x faster installation process
- Actively anchors Geocell's against natural and sliding forces, reducing the need for heaving anchor and trenching.
- Qty. 120/per box

EROMASTA™ HDPE EroWeb

EROMasta™ HDPE EroWeb is constructed of lightweight and flexible three dimensional, expandable perforated panels made from high-density polyethylene (HDPE) strips which are ultrasonically bonded together to form an extremely strong configuration. EROMasta™ HDPE EroWeb System can be filled with a wide range of material: aggregate, concrete, sand, soil, etc.

EROMasta™ HDPE EroWeb is engineered for soil stabilization applications, it's used to help improve the performance of standard construction materials and erosion control treatments

MASTAWALL™ Mattresses

mastaWALL™ Mattresses are low profile baskets constructed of double twisted hexagonal woven galvanized steel wire with internal diaphragms that create compartments or cells.

The compartment or cells are of equal dimensions and spacing to provide even distribution of the stone fill throughout the mattress even after structural movement. Even distribution of the stone fill ensures that the mastaWALL™ mattress maintains intimate contact with the foundation soil.

326 DRAINAGE SYSTEMS

GEO MASTA™

DRAIN MASTA™ StripFilter

DRAINmasta™ StripFilter is a prefabricated composite product designed to effectively filter and transport groundwater. All DRAINmasta™ HDPE drainage cores are bound with mastaTEX™ Nonwoven which is a high flow PE filament geotextile to prevent the ingress of foreign particles which would create long term blockage and flow issues.

DRAINmasta™ StripFilter is designed for subsoil drainage in road pavements, sports field drainage, behind shotcreting and bank stabilisation. DRAINmasta™ StripFilter requires minimal excavation and comes in a range of sizes to suit a variety of site applications.

All DRAINmasta™ products are inert to most alkalis and acids that are found in soil environments.

**GEO MASTA™ Drainage Cell**

GEOmasta® Drainage Cell 30 creates a permanent non-clogging void between the concrete slab and the soil profile that will not collapse or distort. The 30mm void enables a direct flow of water to designated outlets avoiding the risk of water build-up and penetration.

The large surface and capacity void space enables superior drainage efficiency compared to the small voids created by using a gravel system. The lightweight nature of this product reduces weight on the structure by 98% over gravel making it the perfect choice for planter boxes, of gardens and landscaped podiums.

SILTMASTA™ SediFence

SILTmasta™ SediFence is designed for protection of natural surrounding areas during the course of earthworks & construction activities for a variety of civil engineering & domestic projects. Sensitive aquatic margins require protection from sediment run-off which can contaminate water-bodies due to nutrient overload.

SILTmasta™ SediFence is utilized to prevent such contamination by flanking exposed soils or bordering entire construction sites.

Soil erosion, sediment and litter from construction sites can be major sources of storm water pollution and can cause significant harm to the environment.

Anyone on a building site who does not comply with sediment control regulations can be prosecuted or issued with on-the-spot fines. Companies, builders, subcontractors and individuals can all be fined.

SILT FENCE

Genuine Siltmasta SF5000 - Premium Silt Fence

Premium SF5000 Silt Fence is a special, high quality, permeable, technical filter fabric that can be installed as an entrenched vertical barrier fence, and is designed to intercept and detain runoff, trapping harmful silt through settlement and filtration before it leaves the site.

Roll Height: 750mm
Roll Length: 100m

328 EROSION & SEDIMENT CONTROL

GEO MASTA™

SILT MASTA™ SiltCurtain

The **Siltmasta™ SiltCurtain** controls silt run off in streams by acting as a floating barrier. The curtain is made from geotextile material with closed cell foam flotation and a ballast pocket at the bottom for chain.

Silt Curtains, also known as Sediment Curtains or Flotation Curtains are designed and used to control sediment, algae or debris movement in waterways. Silt Curtains consist of a high visibility reinforced plastic flotation pocket, a non woven needle punched geotextile skirt to act as the filter and ballast pocket.

Standard Size

Size: 15m x 1.5m (Deep) including chain

**ASSISE™ SiltWarden**

ASSISE™ Silt Warden uses a high tensile, UV stabilised HDPE shade cloth to provide storm water inlet protection.

The **ASSISE™ DrainWarden** fits inside an existing drain pit while the drain grate holds this inlet protection device in place.

PRICE PER UNIT		All prices +GST	
CODE	SIZE	4 +	1 - 3
30-SW12	1.3m(L) x 1.3m(W) Basin: 600m	\$345.90	\$391.20

ASSISE™ DrainWarden

The drain warden is made from fabric. The polypropylene nonwoven geotextile fabric is the filter medium – any particulate greater than 90 microns will be trapped by the fabric.

An absorbent polypropylene mini boom in the basin of the drain warden traps hydrocarbons, oils and fuels.

PRICE PER UNIT		All prices +GST	
CODE	SIZE	5 +	1 - 4
30-DW12	1.3m(L) x 1.3m(W) Basin: 600m	\$196.75	\$206.00

ASSISE™ DeWatering Bags

The **Assise® Dewatering and Sediment Filter bags** are perfect for pumping and filtering sediment laden water. The dewatering bags provide a simple yet effective method of removing heavy particles (>90 microns) from excavation water allowing silt free water to be released from the bag.

- 270gsm geotextile fabric
- Double thickness neck for strength
- 90 micron pore size
- Double stitching
- Male camlock connector

**EROMASTA™ Jute Mesh**

EROMasta™ Jute Mesh is a fully biodegradable organic product made from Jute, which is a derivative of Hessian. Specifically designed to be an erosion control mat, jute mesh creates an environment which promotes rapid natural plant growth.

- 1.2m x 549m (Bale), 1.2m x 68m
- 485gsm

PRICE PER UNIT

All prices + GST

JM12-68M	68m	\$86.95	\$95.60	\$108.50	\$121.50

**EROMASTA™ CoirMesh**

EROMasta™ CoirMesh is an open weave organic fibre mat made from 100% coconut fibre. Coir Mesh has a longer effective life than other biodegradable erosion control materials and can last up to 3 years. Coir products hold water efficiently, ensuring a moist environment to promote faster plant growth.

EROMasta™ CoirMesh has a higher tensile strength than the more common JuteMesh products, allowing it to be installed on steeper batters, or areas with a higher water flow.

**COIRMASTA™ CoirLogs**

COIRmasta™ CoirLogs are an environmentally friendly alternative to hay bales and expensive rip-raps or cement stabilisation techniques. COIRmasta™ CoirLogs are ideal for constructing check structures, managing changes in stream flow velocity, shaping channels and stabilising shorelines.

A natural planting medium for vegetation and made from 100% coir (coconut) fibre compacted into an outer mesh of bristle coir twine, COIRmasta™ CoirLogs are a totally biodegradable material that last up to three to five years and are biodegradable within 5-10 years. They are easily installed and will blend naturally into the environment over time.

GEO MASTA® Root Barrier HDPE

GEOmasta® Root Barrier is designed to prevent the intrusion of tree root systems into sensitive areas. Tree Roots can aggressively spread and cause costly damage to buildings, pipes, foot paths and roadways, becoming both dangerous and expensive to repair. Made of virgin HDPE (High Density Polyethylene), GEOmasta Root Barrier offers superior performance and is more cost effective than traditional methods such as CFC Sheeting or Sheet Metal.

Care should be taken to install Root Barrier from surface level to 25% below the nominal root depth of the tree species being planted to ensure the roots do not grow under or around the barrier.

Smooth sided Root Barrier is generally the preferred option for root deflection due to the limited hold offered for young roots.

GEO MASTA® Corflute Tree Guards

GEOmasta® Corflute Tree Guards are a heavy duty rigid plastic shelter for young trees, designed to protect against damaging winds, herbicide overspray and animal damage.

They are very durable, quick and easy to install requiring only 1 tree stake, and can be reused if required. Designed to last 2-3 seasons in Australian conditions, meeting local council requirements.

GEOmasta® Tree Guards have small holes designed to allow plant breathability, while still offering superior protection. While they are suitable for many plant types, these guards are ideal for small native plants.

Stake Size required; 750mm x 11mm x 38mm. (30-3811750). 1 stake per guard.

AUTOMATIC HAND SANITISER

Mounted on a stand for easy positioning, it uses a battery operated automatic touch free dispenser to dispense the right amount of hand sanitising gel to the user. A built in drip tray reduces spills. The stand includes a robust low profile non-trip base for maximum stability with a wide profile vertical upright, with the dispenser pre-mounted for convenience.

Assembly is easy using 2 stainless steel phillips head fasteners to screw the 5mm high base plate to the upright. The automatic dispenser features a 1.2 litre refillable tank which allows approximately 1500 doses per refill.

- Robust Design
- Easily Relocatable
- 2 Minute assembly time
- White Powdercoat finish
- 1275mm high unit + additional 210mm sign holder at the top
- Refillable Dispenser Tank for Gel Sanitisers
- 1.2 litre refillable tank allows approximately 1500 doses per refill
- Includes a clear perspex sign holder
- Automatic Touch Free Dispenser
- Unit weight: approximately 14kg
- Base plate meets Australian Standards for trip hazards being 5mm height
- Battery operated dispenser uses 4 x C Batteries (*Sold separately*)
- Refill with any hand sanitiser gel **not liquid/soap (Sold separately)*

*Compatible with gel sanitisers only.
Do not use soap, foam or liquid spray type sanitisers
