

SiltWarden Silt Trap

Product Images

Short Description

Silt Warden silt trap fits inside stormwater drains. Measures 1.3m(L) x 1.3m(W) Basin: 600mm. The unique design of the Silt Warden uses a high tensile, UV stabilised HDPE shade cloth to provide stormwater inlet protection.

Description

The unique design of the SiltWarden uses a high tensile UV stabilised HDPE shade cloth to provide storm water inlet protection. The SiltWarden fits inside an existing drain pit, and the drain grate holds this inlet protection device in place.

The superior horticultural shade cloth captures silt, coarse sediments and debris whilst allowing water to flow through into the stormwater drain. Designed for easy removal with a forklift or other equipment once full, Silt Wardens are ideal for retaining silt on construction sites before roadways and infrastructure is laid.

Features:

- Fits pits from 600 x 600mm to 1300 x 1300mm
- UV Stabilised
- HDPE shade cloth construction
- 300gsm PET with 100 l/m/s flow rate
- Skirt width 1300 x 1300mm
- Basin width 600 x 600mm
- Basin depth 600mm
- Easy to install and remove

Additional Information

CODE	30-SW12
U.O.M	Each
Brand	GEOmasta
Range / Model	ASSISE
Width	1.3 m
