LPG Burner Torch Kit

## Description

---

### Key Features

- Made in Europe, industrial quality & robust heavy-duty design
- Unique hose/handle swivel connection eliminates hose torsion/twisting & improves operator comfort
- Air/LPG operation requires LPG gas only (no oxygen required)
- Use with 4/9/45kg LPG bottles with standard POL connection
- On/off/control needle valve Lever/trigger valve - Hold for full heating flame, Release for small pilot flame (not included on 'Handyflame' torch kit)
- Pilot flame adjustment (not included on 'Handyflame' torch kit) 5/8" UNF LH "welding industry-standard" connections on handle inlet, hose & regulator outlet - for ease of repair & interchangeability

### Application Info

- Metal and pre-weld heating (applications that do not require the higher temperatures of an oxy/fuel torch)
- Drying, thawing
- Heating bitument/ashphalt, line marking, curing concrete

- Vegetation burn-off, weed burning
  
- Shrink-wrapping Roofing & water-proofing, etc
