

Printed Banner Mesh - 1.8m Open Weave Banner / Scrim with Bonus Cable Ties

Product Images

Short Description

Durable 1.8m x 50m open weave banner mesh, fully compliant with WHS requirements, ideal for high wind and coastal sites. With 50% block-out, it allows wind to pass through, reducing strain and extending its lifespan. Easy to handle and install with reinforced edges, this UV-treated mesh offers vibrant print quality and a site life of up to 2 years, making it a reliable and versatile choice for any outdoor application.

Description

The Printed Fence Fabric Wrap is a robust, high-performance banner mesh designed specifically for challenging environments. Measuring 1.8m x 50m, this open weave mesh is fully compliant with all WHS requirements, making it a reliable choice for work sites exposed to high winds or coastal conditions.

Key Features:

- **High Wind Resistance:** The open weave design offers 50% block-out, allowing wind to pass through effortlessly, reducing strain and preventing damage. This makes it perfect for sites with significant wind exposure, such as coastal areas.
- **Durable Construction:** The mesh is constructed with a thinly woven Nylon core, coated in polyvinyl chloride (PVC), ensuring long-lasting durability. The fire retardant inhibitors within the PVC composition enhance safety, although the mesh does not have a specified fire rating.
- **UV Treated for Longevity:** UV-treated polyester mesh withstands prolonged exposure to sunlight, ensuring the print remains vibrant and the material remains intact for up to 2 years.
- **Easy to Handle and Install:** Lightweight and flexible, the banner mesh is simple to roll, unroll, and transport between sites. Installation is quick and fuss-free, typically done using cable ties.
- **Reinforced for Extra Strength:** The fabric includes reinforced strip welded/folded edge banding, enhancing its strength and longevity. Wind slits can also be added during production for an additional fee to further reduce wind resistance.
- **Versatile Application:** Whether you're securing a construction site or promoting your business, the open weave banner mesh provides an excellent base for printing. It handles full or partial print coverage with exceptional quality, making your branding stand out.

Why Choose Our Fence Banner Mesh?

As a trusted supplier, we print all our banner mesh in-house to the highest standards, ensuring no hidden fees or charges. We provide free quotes that cover every aspect of your order, and our fast turnaround times ensure you receive your banner mesh on time, every time.

Additional Details:

- **Dimensions:** 1.8m x 50m rolls
- **Material:** UV treated polyester mesh
- **Weight:** 175 gsm
- **Edge Banding:** Reinforced strip welded/folded edge
- **Block-Out:** 50% for high wind resistance
- **Installation:** Easy to handle and install, with eyelets every metre
- **Site Life:** Up to 2 years

This open weave banner mesh is the ideal solution for securing your work site while also providing an effective platform for advertising, with the durability to withstand harsh conditions.
