

Size C Trailer Mounted Arrow Board, 17 Lamps

Product Images

Short Description

TMAB Single Sided Trailer Mounted Arrow Board measuring 2400 mm x 1200mm, mounted on a trailer. Powered by a 150W solar panel with 10amp solar controller, this single sided arrow board trailer also has a 200Ah deep cycle battery and 12V power connection.

Description

This portable aluminium arrow board mounted on a trailer features 17 amber LED lamps. The highly visible arrow board measures 2400 mm long x 1200 mm high, and is ideal for traffic control and management operations where the arrow board needs to be moved around. The trailer coupling is easily attached to any vehicle with a tow bar and can be positioned in a multitude of ways. The trailer assembly is made from tough galvanized steel powdercoated in bright yellow and fitted with wheel safety chains, a retractable draw bar, tail lights and wiring.

Powered by a 150W solar panel with 10 amp solar controller, this arrow board trailer also has a 200Ah deep cycle battery and 12V power connection. An auto dimming feature ensures power consumption is moderated when necessary. The hydraulic lifting system ensures workers can safely raise and lower the arrow board from the trailer, enabling quick and easy setup.

The Optraffic range of LED arrow boards are ideal for traffic control, roadworks, emergency breakdown support vehicles, workers conducting projects along the verge, and more.

Features:

- Aluminum Cabinet
- Arrow Panel measures 2400 mm x 1200 mm
- 17 LED Lamps (full range of replacement parts available from Jaybro)
- 12V Power
- One 150W Solar panel
- Solar Controller
- 1 x 200AH deep cycle battery on board
- External AC battery charger and all weather outlet
- Auto dimming
- Black powdercoat
- Trailer: Powder coated mast and hot galvanized steel structure, solid axle, hydraulic lifting system, wheel safety chains, retractable galvanised draw bar
- Stop / tail light combo
- Licence plate light
- Wiring & switch
- Cooling fans included
