

# Poly Woven Strapping Dispenser, suits 500m Roll

## Product Images

## Short Description

---

Poly woven strapping dispenser to suit 500 metre rolls of strapping. Use along with the strapping, tensioning tool and poly buckles to create a safer alternative system to steel strapping.

Strapping sold separately.

## Description

---

This sturdy metal strapping dispenser suits our 500 metre rolls of polywoven strapping. It is made from tubular metal with a carry handle and guide loop to feed the strapping through, preventing tangles. A simple screw on nut tightens the strapping spool ensuring it stays put and dispenses easily.

Polywoven strapping is lightweight, reusable, and a much safer alternative to metal or steel strapping.

Use with the spring action tensioning tool to pull your poly woven pallet strapping tight and secure, ensuring your packages and bundles stay together. When used with poly buckles, it is part of a fast effective wrapping system.

**Features:**

- Suits Poly woven strap 19mm x 500m
- Tensioning nut ensures spool runs freely
- Lightweight with a carry handle
- Tubular metal construction
- Guide loop keeps strapping ready in the right position
- Safe alternative to metal strapping systems with a reduced risk of cuts and lacerations
