

# V Lock Wedge / Pin Puller

## Product Images

## Short Description

---

Tool for removing Vlock wedges assisting in post-replacement.

## Description

---

The V Lock is a lock and wedge sign post locking system for installing and anchoring posts. It is extremely quick and easy to install. Simply install the V lock anchor, insert the sign post and drive the wedge into the anchor, locking the post in place. The V lock socket mounts flush to ground, and is ideal for mounting in concrete. It is fully galvanised, ensuring the socket and wedge have a long life span. The V lock socket is 275mm long, which provides a stable and sturdy fixture point.

The wedge can be removed easily with this specialised wedge pulling tool, The Wedge Puller is the ideal tool for removing the wedges from the V Lock and it is simple to use. You simply place the puller inside the wedge and slide the red handle up to extract the wedge. Removed wedges are reusable time and time again.
